

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

Form 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended January 27, 2013

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 000-06920

Applied Materials, Inc.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation or organization)

3050 Bowers Avenue,

P.O. Box 58039

Santa Clara, California

(Address of principal executive offices)

94-1655526

(I.R.S. Employer Identification No.)

95052-8039

(Zip Code)

(408) 727-5555

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Number of shares outstanding of the issuer's common stock as of January 27, 2013: 1,200,044,358

APPLIED MATERIALS, INC.**NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS
(Unaudited)****Note 1 Basis of Presentation*****Basis of Presentation***

In the opinion of management, the unaudited interim consolidated condensed financial statements of Applied Materials, Inc. and its subsidiaries (Applied or the Company) included herein have been prepared on a basis consistent with the October 28, 2012 audited consolidated financial statements and include all material adjustments, consisting of normal recurring adjustments, necessary to fairly present the information set forth therein. These unaudited interim consolidated condensed financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in Applied's Annual Report on Form 10-K for the fiscal year ended October 28, 2012 (2012 Form 10-K). Applied's results of operations for the three months ended January 27, 2013 are not necessarily indicative of future operating results. Applied's fiscal year ends on the last Sunday in October of each year. Fiscal 2013 and 2012 each contain 52 weeks, and the first quarter of fiscal 2013 and 2012 each contained 13 weeks.

Certain prior year amounts have been reclassified to conform to current year presentation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make judgments, estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ materially from those estimates. On an ongoing basis, Applied evaluates its estimates, including those related to accounts receivable and sales allowances, fair values of financial instruments, inventories, intangible assets and goodwill, useful lives of intangible assets and property and equipment, fair values of share-based awards, and income taxes, among others. Applied bases its estimates on historical experience and on various other assumptions that are believed to be reasonable, the results of which form the basis for making judgments about the carrying values of assets and liabilities.

Revenue Recognition

Applied recognizes revenue when all four revenue recognition criteria have been met: persuasive evidence of an arrangement exists; delivery has occurred or services have been rendered; seller's price to buyer is fixed or determinable; and collectability is probable. Applied's shipping terms are customarily FOB Applied shipping point or equivalent terms. Applied's revenue recognition policy generally results in revenue recognition at the following points: (1) for all transactions where legal title passes to the customer upon shipment, Applied recognizes revenue upon shipment for all products that have been demonstrated to meet product specifications prior to shipment; the portion of revenue associated with certain installation-related tasks is deferred, and that revenue is recognized upon completion of the installation-related tasks; (2) for products that have not been demonstrated to meet product specifications prior to shipment, revenue is recognized at customer technical acceptance; (3) for transactions where legal title does not pass at shipment, revenue is recognized when legal title passes to the customer, which is generally at customer technical acceptance; and (4) for arrangements containing multiple elements, the revenue relating to the undelivered elements is deferred using the relative selling price method utilizing estimated sales prices until delivery of the deferred elements. Applied limits the amount of revenue recognition for delivered elements to the amount that is not contingent on the future delivery of products or services, future performance obligations or subject to customer-specified return or adjustment. In cases where Applied has sold products that have been demonstrated to meet product specifications prior to shipment, Applied believes that at the time of delivery, it has an enforceable claim to amounts recognized as revenue. Spare parts revenue is generally recognized upon shipment, and services revenue is generally recognized over the period that the services are provided.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

When a sales arrangement contains multiple elements, such as hardware and services and/or software products, Applied allocates revenue to each element based on a selling price hierarchy. The selling price for a deliverable is based on its vendor specific objective evidence (VSOE) if available, third party evidence (TPE) if VSOE is not available, or estimated selling price (ESP) if neither VSOE nor TPE is available. Applied generally utilizes the ESP due to the nature of its products. In multiple element arrangements where more-than-incidental software deliverables are included, revenue is allocated to each separate unit of accounting for each of the non-software deliverables and to the software deliverables as a group using the relative selling prices of each of the deliverables in the arrangement based on the aforementioned selling price hierarchy. If the arrangement contains more than one software deliverable, the arrangement consideration allocated to the software deliverables as a group is then allocated to each software deliverable using the guidance for recognizing software revenue.

Recent Accounting Pronouncements

In February 2013, the Financial Accounting Standards Board (FASB) issued authoritative guidance that will require a public entity to present in its annual and interim financial statements information about reclassification adjustments from accumulated other comprehensive income in a single note or on the face of the financial statements. The authoritative guidance becomes effective for Applied in the first quarter of fiscal 2014, with early adoption permitted, and is not expected to have an impact on Applied's financial position or results of operations.

Note 2 Earnings Per Share

Basic earnings per share is determined using the weighted average number of common shares outstanding during the period. Diluted earnings per share is determined using the weighted average number of common shares and potential common shares (representing the dilutive effect of stock options, restricted stock units, and employee stock purchase plans shares) outstanding during the period. Applied's net income has not been adjusted for any period presented for purposes of computing basic or diluted earnings per share due to the Company's non-complex capital structure.

	Three Months Ended	
	January 27, 2013	January 29, 2012
	(In millions, except per share amounts)	
Numerator:		
Net income	\$ 34	\$ 117
Denominator:		
Weighted average common shares outstanding	1,198	1,299
Effect of dilutive stock options, restricted stock units and employee stock purchase plan shares	14	11
Denominator for diluted earnings per share	1,212	1,310
Basic and diluted earnings per share	\$ 0.03	\$ 0.09
Potentially dilutive securities	8	18

Potentially dilutive securities attributable to outstanding stock options and restricted stock units were excluded from the calculation of diluted earnings per share because the combined exercise price, average unamortized fair value and assumed tax benefits upon the exercise of options and the vesting of restricted stock units were greater than the average market price of Applied common stock, and therefore their inclusion would have been anti-dilutive.

Maturities of Investments

The following table summarizes the contractual maturities of Applied's investments at January 27, 2013:

	Cost	Estimated Fair Value
(In millions)		
Due in one year or less	\$ 200	\$ 201
Due after one through five years	682	687
No single maturity date**	385	404
	\$ 1,267	\$ 1,292

** Securities with no single maturity date include publicly-traded and privately-held equity securities, and asset-backed and mortgage-backed securities.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

Gains and Losses on Investments

At January 27, 2013 and October 28, 2012, gross unrealized losses related to Applied's investment portfolio were not material. Applied regularly reviews its investment portfolio to identify and evaluate investments that have indications of possible impairment. Factors considered in determining whether an unrealized loss was considered to be temporary, or other-than-temporary and therefore impaired, include: the length of time and extent to which fair value has been lower than the cost basis; the financial condition, credit quality and near-term prospects of the investee; and whether it is more likely than not that Applied will be required to sell the security prior to recovery. Generally, the contractual terms of investments in marketable securities do not permit settlement at prices less than the amortized cost of the investments. Applied determined that the gross unrealized losses on its marketable securities at January 27, 2013 and January 29, 2012 were temporary in nature and therefore it did not recognize any impairment of its marketable securities during the three months ended January 27, 2013 or January 29, 2012. Applied did not recognize any impairment on its equity investments in privately-held companies for the three months ended January 27, 2013 or January 29, 2012.

Unrealized gains and temporary losses on investments classified as available-for-sale are included within accumulated other comprehensive income (loss), net of any related tax effect. Upon realization, those amounts are reclassified from accumulated other comprehensive income (loss) to results of operations.

Note 4 Fair Value Measurements

Applied's financial assets are measured and recorded at fair value, except for equity investments in privately-held companies. These equity investments are generally accounted for under the cost method of accounting and are periodically assessed for other-than-temporary impairment when events or circumstances indicate that an other-than-temporary decline in value may have occurred. Applied's nonfinancial assets, such as goodwill, intangible assets, and property, plant and equipment, are recorded at cost and are assessed for impairment when events or circumstances indicate that an other-than-temporary decline in value may have occurred.

Fair Value Hierarchy

Applied uses the following fair value hierarchy, which prioritizes the inputs to valuation techniques used to measure fair value into three levels and bases the categorization within the hierarchy upon the lowest level of input that is available and significant to the fair value measurement:

- Level 1 — Quoted prices in active markets for identical assets or liabilities;
- Level 2 — Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; and
- Level 3 — Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Applied's investments are comprised primarily of debt securities that are classified as available-for-sale and recorded at their fair values. In determining the fair value of investments, Applied uses pricing information from pricing services that value securities based on quoted market prices and models that utilize observable market inputs. In the event a fair value estimate is unavailable from a pricing service, Applied generally obtains non-binding price quotes from brokers. Applied then reviews the information provided by the pricing services or brokers to determine the fair value of its short-term and long-term investments. In addition, to validate pricing information obtained from pricing services, Applied periodically performs supplemental analysis on a sample of securities. Applied reviews any significant unanticipated differences identified through this analysis to determine the appropriate fair value.

Investments with remaining effective maturities of 12 months or less from the balance sheet date are classified as short-term investments. Investments with remaining effective maturities of more than 12 months from the balance sheet date are classified as long-term investments. As of January 27, 2013, substantially all of Applied's available-for-sale, short-term and long-term investments were recognized at fair value that was determined based upon observable inputs.

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

Assets and Liabilities Measured at Fair Value on a Recurring Basis

Financial assets and liabilities (excluding cash balances) measured at fair value on a recurring basis are summarized below as of January 27, 2013 and October 28, 2012:

	January 27, 2013			October 28, 2012		
	Level 1	Level 2	Total	Level 1	Level 2	Total
(In millions)						
Assets:						
Money market funds	\$ 814	\$ —	\$ 814	\$ 483	\$ —	\$ 483
U.S. Treasury and agency securities	108	103	211	128	246	374
Non-U.S. government securities	—	13	13	—	29	29
Municipal securities	—	391	391	—	431	431
Commercial paper, corporate bonds and medium-term notes	—	273	273	—	384	384
Asset-backed and mortgage-backed securities	—	286	286	—	298	298
Publicly traded equity securities	46	—	46	47	—	47
Total	\$ 968	\$ 1,066	\$ 2,034	\$ 658	\$ 1,388	\$ 2,046

There were no transfers between Level 1 and Level 2 fair value measurements during the three months ended January 27, 2013 or January 29, 2012. Applied did not have any financial assets measured at fair value on a recurring basis within Level 3 fair value measurements as of January 27, 2013 or October 28, 2012.

Assets and Liabilities Measured at Fair Value on a Non-recurring Basis

Equity investments in privately-held companies are generally accounted for under the cost method of accounting and are periodically assessed for other-than-temporary impairment when an event or circumstance indicates that an other-than-temporary decline in value may have occurred. If Applied determines that an other-than-temporary impairment has occurred, the investment will be written down to its estimated fair value based on available information, such as pricing in recent rounds of financing, current cash positions, earnings and cash flow forecasts, recent operational performance and any other readily available market data. At January 27, 2013, equity investments in privately-held companies totaled \$72 million, of which \$59 million of investments were accounted for under the cost method of accounting and \$13 million of investments had been measured at fair value on a non-recurring basis within Level 3 fair value measurements due to an other-than-temporary decline in value. At October 28, 2012, equity investments in privately-held companies totaled \$70 million, of which \$57 million of investments were accounted for under the cost method of accounting and \$13 million of investments had been measured at fair value on a non-recurring basis within Level 3 fair value measurements due to an other-than-temporary decline in value. Applied did not recognize any impairment on its equity investments in privately-held companies during the three months ended January 27, 2013 or January 29, 2012.

Other

The carrying amounts of Applied's financial instruments, including cash and cash equivalents, accounts receivable, notes payable, and accounts payable and accrued expenses, approximate fair value due to the short maturities of these financial instruments. At January 27, 2013, the carrying amount of long-term debt was \$1.9 billion and the estimated fair value was \$2.2 billion. At October 28, 2012, the carrying amount of long-term debt was \$1.9 billion and the estimated fair value was \$2.3 billion. The estimated fair value of long-term debt is determined by Level 2 inputs and is based primarily on quoted market prices for the same or similar issues.

Note 5 Derivative Instruments and Hedging Activities*Derivative Financial Instruments*

Applied conducts business in a number of foreign countries, with certain transactions denominated in local currencies, such as Japanese yen, euro, Israeli shekel, Taiwanese dollar and Swiss franc. Applied uses derivative financial instruments, such as forward exchange contracts and currency option contracts, to hedge certain forecasted foreign currency denominated transactions expected to occur typically up to the next 24 months. The purpose of Applied's foreign currency management is to mitigate the effect of exchange rate fluctuations on certain foreign currency denominated revenues, costs and eventual cash flows. The terms of currency instruments used for hedging purposes are generally consistent with the timing of the transactions being hedged. Applied does not use derivative financial instruments for trading or speculative purposes.

Derivative instruments and hedging activities, including foreign currency exchange contracts, are recognized on the balance sheet at fair value. Changes in the fair value of derivatives that do not qualify for hedge treatment, as well as the ineffective portion of any hedges, are recognized currently in earnings. All of Applied's derivative financial instruments are recorded at their fair value in other current assets or in accounts payable and accrued expenses.

Hedges related to anticipated transactions are designated and documented at the inception of the hedge as cash flow hedges and are typically entered into once per month. Cash flow hedges are evaluated for effectiveness quarterly. The effective portion of the gain or loss on these hedges is reported as a component of accumulated other comprehensive income or loss (AOCI) in stockholders' equity and is reclassified into earnings when the hedged transaction affects earnings. The majority of the after-tax net income or loss related to derivative instruments included in AOCI at January 27, 2013 is expected to be reclassified into earnings within 12 months. Changes in the fair value of currency forward exchange and option contracts due to changes in time value are excluded from the assessment of effectiveness. Both ineffective hedge amounts and hedge components excluded from the assessment of effectiveness are recognized in earnings. If the transaction being hedged is no longer probable to occur, or if a portion of any derivative is deemed to be ineffective, Applied promptly recognizes the gain or loss on the associated financial instrument in general and administrative expenses. The amount recognized due to discontinuance of cash flow hedges that were probable not to occur by the end of the originally specified time period was not significant for the three months ended January 27, 2013 and January 29, 2012.

Additionally, forward exchange contracts are generally used to hedge certain foreign currency denominated assets or liabilities. These derivatives are typically entered into once per month and are not designated for hedge accounting treatment. Accordingly, changes in the fair value of these hedges are recorded in earnings to offset the changes in the fair value of the assets or liabilities being hedged.

The fair values of derivative instruments at January 27, 2013 and October 28, 2012 were not material.

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

The effect of derivative instruments on the Consolidated Condensed Statements of Operations for the three months ended January 27, 2013 and January 29, 2012 was as follows:

Credit Risk Contingent Features

If Applied's credit rating were to fall below investment grade, it would be in violation of credit risk contingent provisions of the derivative instruments discussed above, and certain counterparties to the derivative instruments could request immediate payment on derivative instruments in net liability positions. The aggregate fair value of all derivative instruments with credit-risk related contingent features that were in a net liability position was immaterial as of January 27, 2013.

Entering into foreign exchange contracts with banks exposes Applied to credit-related losses in the event of the banks' nonperformance. However, Applied's exposure is not considered significant.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

Note 6 Accounts Receivable, Net

Applied has agreements with various financial institutions to sell accounts receivable and discount promissory notes from selected customers. Applied, from time to time, also discounts letters of credit through various financial institutions. Applied sells its accounts receivable without recourse.

Applied did not utilize programs to discount letters of credit issued by customers during the three months ended January 27, 2013 and January 29, 2012. Discounting of letters of credit depends on many factors, including the willingness of financial institutions to discount the letters of credit and the cost of such arrangements. There was no factoring of accounts receivable or discounting of promissory notes during the three months ended January 27, 2013. Applied factored accounts receivable and discounted promissory notes of \$70 million during the three months ended January 29, 2012. Financing charges on the sale of receivables and discounting of letters of credit are included in interest expense in the accompanying Consolidated Condensed Statements of Operations and were not material for all periods presented.

Accounts receivable are presented net of allowance for doubtful accounts of \$82 million at January 27, 2013 and \$87 million at October 28, 2012. Applied sells principally to manufacturers within the semiconductor, display and solar industries. While Applied believes that its allowance for doubtful accounts is adequate and represents Applied's best estimate as of January 27, 2013, Applied continues to closely monitor customer liquidity and other economic conditions, which may result in changes to Applied's estimates regarding collectability.

Note 8 Goodwill, Purchased Technology and Other Intangible Assets***Goodwill and Purchased Intangible Assets***

Applied's methodology for allocating the purchase price relating to purchase acquisitions is determined through established and generally accepted valuation techniques. Goodwill is measured as the excess of the purchase price over the sum of the amounts assigned to tangible and identifiable intangible assets acquired less liabilities assumed. Applied assigns assets acquired (including goodwill) and liabilities assumed to one or more reporting units as of the date of acquisition. Typically, acquisitions relate to a single reporting unit and thus do not require the allocation of goodwill to multiple reporting units. If the products obtained in an acquisition are assigned to multiple reporting units, the goodwill is distributed to the respective reporting units as part of the purchase price allocation process.

Goodwill and purchased intangible assets with indefinite useful lives are not amortized, but are reviewed for impairment annually during the fourth quarter of each fiscal year and whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. The process of evaluating the potential impairment of goodwill and intangible assets requires significant judgment, especially in emerging markets. Applied regularly monitors current business conditions and other factors including, but not limited to, adverse industry or economic trends, restructuring actions and lower projections of profitability that may impact future operating results.

To test goodwill for impairment, Applied first performs a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If it is concluded that this is the case, it is necessary to perform the two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. Under the two-step goodwill impairment test, Applied would in the first step compare the estimated fair value of each reporting unit to its carrying value. If the carrying value of a reporting unit exceeds its fair value, Applied would then perform the second step of the impairment test in order to determine the implied fair value of the reporting unit's goodwill. If Applied determined that the carrying value of a reporting unit's goodwill exceeded its implied fair value, Applied would record an impairment charge equal to the difference. Applied's reporting units are consistent with the reportable segments identified in Note 15, Industry Segment Operations, which are based on the manner in which Applied operates its business and the nature of those operations. Applied determines the fair value of each of its reporting units based on a weighting of income and market approaches.

The evaluation of goodwill for impairment requires the exercise of significant judgment. In the event of future changes in business conditions, Applied will be required to reassess and update its forecasts and estimates used in future impairment analyses. If the results of these analyses are lower than current estimates, a material impairment charge may result at that time.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

A summary of Applied's purchased technology and intangible assets is set forth below:

	January 27, 2013	October 28, 2012
	(In millions)	
Purchased technology, net	\$ 903	\$ 945
Intangible assets - finite-lived, net	257	268
Intangible assets - indefinite-lived	142	142
Total	<u>\$ 1,302</u>	<u>\$ 1,355</u>

Details of goodwill and other indefinite-lived intangible assets were as follows as of January 27, 2013 and October 28, 2012:

	Goodwill	Other Intangible Assets	Total
	(In millions)		
Silicon Systems Group	\$ 2,151	\$ 142	\$ 2,293
Applied Global Services	1,027	—	1,027
Display	116	—	116
Energy and Environmental Solutions	224	—	224
Carrying amount	<u>\$ 3,518</u>	<u>\$ 142</u>	<u>\$ 3,660</u>

Other intangible assets that are not subject to amortization consist primarily of in-process technology, which will be subject to amortization upon commercialization. The fair value assigned to in-process technology was determined using the income approach based on estimates and judgments regarding risks inherent in the development process, including the likelihood of achieving technological success and market acceptance. If an in-process technology project is abandoned, the acquired technology attributable to the project will be written off.

Finite-Lived Purchased Intangible Assets

Applied amortizes purchased intangible assets with finite lives using the straight-line method over the estimated economic lives of the assets, ranging from 1 to 15 years.

Applied evaluates long-lived assets for impairment whenever events or changes in circumstances indicate the carrying value of an asset group may not be recoverable. Applied assesses the fair value of the assets based on the amount of the undiscounted future cash flow that the assets are expected to generate and recognizes an impairment loss when estimated undiscounted future cash flow expected to result from the use of the asset, plus net proceeds expected from disposition of the asset, if any, are less than the carrying value of the asset. When Applied identifies an impairment, Applied reduces the carrying value of the group of assets to comparable market values, when available and appropriate, or to its estimated fair value based on a discounted cash flow approach.

Intangible assets, such as purchased technology, are generally recorded in connection with a business acquisition. The value assigned to intangible assets is usually based on estimates and judgments regarding expectations for the success and life cycle of products and technology acquired. Applied evaluates the useful lives of its intangible assets each reporting period to determine whether events and circumstances require revising the remaining period of amortization. In addition, Applied reviews intangible assets for impairment when events or changes in circumstances indicate their carrying value may not be recoverable. Management considers such indicators as significant differences in actual product acceptance from the estimates, changes in the competitive and economic environments, technological advances, and changes in cost structure.

2017	174
Thereafter	269
Total	\$ 1,160

Note 9 Borrowing Facilities and Long-Term Debt

Applied has credit facilities for unsecured borrowings in various currencies of up to \$1.6 billion, of which \$1.5 billion is comprised of a committed revolving credit agreement with a group of banks that is scheduled to expire in May 2016. This agreement provides for borrowings in United States dollars at interest rates keyed to one of the two rates selected by Applied for each advance and includes financial and other covenants with which Applied was in compliance at January 27, 2013. Remaining credit facilities in the amount of approximately \$91 million are with Japanese banks. Applied's ability to borrow under these facilities is subject to bank approval at the time of the borrowing request, and any advances will be at rates indexed to the banks' prime reference rate denominated in Japanese yen. No amounts were outstanding under any of these facilities at both January 27, 2013 and October 28, 2012 and Applied has not utilized these credit facilities.

Long-term debt outstanding as of January 27, 2013 and October 28, 2012 was as follows:

	Principal Amount	Effective Interest Rate	Interest Pay Dates
	(In millions)		
2.650% Senior Notes Due 2016	\$ 400	2.666%	June 15, December 15
7.125% Senior Notes Due 2017	200	7.190%	April 15, October 15
4.300% Senior Notes Due 2021	750	4.326%	June 15, December 15
5.850% Senior Notes Due 2041	600	5.879%	June 15, December 15
	1,950		
Total unamortized discount	(4)		
Total long-term debt	<u>\$ 1,946</u>		

Applied has debt agreements that contain financial and other covenants. These covenants require Applied to maintain certain minimum financial ratios. At January 27, 2013, Applied was in compliance with all such covenants.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

Note 10 Restructuring Charges and Asset Impairments

From time to time, Applied initiates restructuring activities to appropriately align its cost structure relative to prevailing economic and industry conditions and associated customer demand as well as in connection with certain acquisitions. Costs associated with restructuring actions can include termination benefits and related charges in addition to facility closure, contract termination and other related activities.

The following table summarizes major components of the restructuring and asset impairment charges during the three months ended January 27, 2013:

	January 27, 2013
	(In millions)
<i>2012 Global Restructuring Plan</i>	
Severance and other employee-related costs, net ¹	\$ 4
<i>2012 EES Restructuring Plan</i>

<i>Others</i>	
Severance and other employee-related costs	2
	<u>\$ 9</u>

¹ Consisted primarily of share-based compensation expense which was recorded in additional paid-in capital.

Restructuring and asset impairment charges were recorded as follows:

	January 27, 2013
	(In millions)
Silicon Systems Group	\$ 1
Applied Global Services	1
Energy and Environmental Solutions	3
Corporate Unallocated	4
Total	<u>\$ 9</u>

Global Restructuring Plan

On October 3, 2012, Applied announced a restructuring plan (the 2012 Global Restructuring Plan) to realign its global workforce and enhance its ability to invest for growth. Under this plan, Applied implemented a voluntary retirement program and other workforce reduction actions that are expected to affect approximately 900 to 1,300 positions, or 6 percent to 9 percent of its global workforce. The voluntary retirement program was available to certain U.S. employees who met minimum age and length of service requirements, as well as other business-specific criteria. Applied implemented other workforce reduction actions globally across multiple business segments and functions, the extent of which depended on the number of employees who participated in the voluntary retirement program and other considerations. Applied expects to substantially complete this plan by the end of the third quarter of fiscal 2013, depending on local legal requirements.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

In connection with the 2012 Global Restructuring Plan, Applied expects to incur aggregate pre-tax restructuring charges comprised of severance and other termination benefits in the range of \$120 million to \$160 million (including costs incurred to date of \$110 million discussed below), which is below the original estimate of \$180 million to \$230 million. The change in the estimate is primarily due to lower relative participation in the voluntary retirement program and a reduced estimate of the final cost of benefits. Applied began recording these restructuring charges in the fourth quarter of fiscal 2012 and expects that the remainder will be recorded during fiscal 2013. The change in the range of estimated pre-tax restructuring costs of this plan did not have an effect on the restructuring charges recognized to date.

During the first quarter of fiscal 2013, Applied recognized \$4 million of employee-related costs in connection with the 2012 Global Restructuring Plan, which was primarily related to share-based compensation expense for accelerated vesting of certain stock awards as part of the voluntary retirement program. These costs were not allocated to the segments. As of January 27, 2013, severance and other termination benefits of \$110 million have been incurred since the inception of this plan.

2012 EES Restructuring Plan

On May 10, 2012, Applied announced a plan (the 2012 EES Restructuring Plan) to restructure its Energy and Environmental Solutions segment in light of challenging industry conditions affecting the solar photovoltaic and light-emitting diode (LED) equipment markets. As of January 27, 2013, as part of this plan, Applied was in the process of relocating certain manufacturing, business operations and customer support functions of its precision wafering systems business and had ceased LED development activities. This plan also impacted certain LED support activities in the Applied Global Services segment. The total estimated pre-tax cost of implementing this plan is expected to be in the range of approximately \$70 million to \$100 million, which will be incurred over a period of 12 to 18 months beginning in the third quarter of fiscal 2012, and reported primarily in the Energy and Environmental Solutions segment. This estimate consists of: (i) up to \$30 million in fixed asset impairment charges; (ii) up to \$15 million of inventory-related charges; (iii) up to \$15 million in charges arising from lease terminations and other obligations, and (iv) up to \$40 million in severance and other employee-related costs. The 2012 EES Restructuring Plan impacted up to approximately 250 positions globally. During the first quarter of fiscal 2013, Applied recognized \$3 million of asset impairment charges in connection with this plan, which were reported in the Energy and Environmental Solutions segment. As of January 27, 2013, total costs incurred in implementing this plan totaled \$64 million, of which \$13 million were inventory-related charges.

Integration of Varian Semiconductor Associates, Inc. (Varian)

During the first quarter of fiscal 2013, Applied recognized \$2 million of severance and other employee-related costs in connection with the integration of Varian, which were reported in the Silicon Systems Group and Applied Global Services segments. As of January 27, 2013, the remaining severance accrual associated with restructuring reserves under this program was \$3 million.

Restructuring Reserves

Changes in restructuring reserves during the three months ended January 27, 2013 were as follows:

	2012 Global Restructuring Plan		2012 EES Restructuring Plan		Others		Total
	Severance and Other Employee-Related Costs	Severance and Other Employee-Related Costs	Contract Cancellation and Other Costs	Severance and Other Employee-Related Costs	Contract Cancellation and Other Costs

Note 11 Stockholders' Equity, Comprehensive Income and Share-Based Compensation*Accumulated Other Comprehensive Income (Loss)*

Components of accumulated other comprehensive income (loss), on an after-tax basis where applicable, were as follows:

	January 27, 2013	October 28, 2012
	(In millions)	
Unrealized gain on investments, net	\$ 16	\$ 16
Unrealized gain on derivative instruments qualifying as cash flow hedges	6	1
Pension liability	(93)	(90)
Cumulative translation adjustments	9	12
	<u>\$ (62)</u>	<u>\$ (61)</u>

Stock Repurchase Program

On March 5, 2012, Applied's Board of Directors approved a stock repurchase program authorizing up to \$3.0 billion in repurchases over the next three years ending in March 2015. Under this authorization, Applied purchases shares of its common stock under a systematic stock repurchase program and may also make supplemental stock repurchases from time to time, depending on market conditions, stock price and other factors. At January 27, 2013, \$1.8 billion remained available for future stock repurchases under this repurchase program.

The following table summarizes Applied's stock repurchases for the periods indicated:

	Three Months Ended	
	January 27, 2013	January 29, 2012
	(In millions, except per share amounts)	
Shares of common stock repurchased	4	18
Cost of stock repurchased	\$ 48	\$ 200
Average price paid per share	\$ 11.15	\$ 10.95

Applied records treasury stock purchases under the cost method using the first-in, first-out (FIFO) method. Upon reissuance of treasury stock, amounts in excess of the acquisition cost are credited to additional paid in capital. If Applied reissues treasury stock at an amount below its acquisition cost and additional paid in capital associated with prior treasury stock transactions is insufficient to cover the difference between the acquisition cost and the reissue price, this difference is recorded against retained earnings.

Dividends

In December 2012, Applied's Board of Directors declared a quarterly cash dividend in the amount of \$0.09 per share that will be paid on March 13, 2013 to stockholders of record as of February 20, 2013. Dividends declared during the three months ended January 27, 2013 and January 29, 2012 were \$108 million and \$103 million, respectively. Applied currently anticipates that cash dividends will continue to be paid on a quarterly basis, although the declaration of any future cash dividend is at the discretion of the Board of Directors and will depend on Applied's financial condition, results of operations, capital requirements, business conditions and other factors, as well as a determination by the Board of Directors that cash dividends are in the best interests of Applied's stockholders.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

Share-Based Compensation

Applied has a stockholder-approved equity plan, the Employee Stock Incentive Plan, which permits grants to employees of share-based awards, including stock options, restricted stock, restricted stock units, performance shares and performance units. In addition, the plan provides for the automatic grant of restricted stock units to non-employee directors and permits the grant of share-based awards to non-employee directors and consultants. Share-based awards made beginning in March 2012 under the plan may be subject to accelerated vesting under certain circumstances in the event of a change in control of Applied. Applied also has two Employee Stock Purchase Plans, one generally for United States employees and a second for employees of international subsidiaries (collectively, ESPP), which enable eligible employees to purchase Applied common stock.

During the three months ended January 27, 2013 and January 29, 2012, Applied recognized share-based compensation expense related to stock options, ESPP shares, restricted stock, restricted stock units, performance shares and performance units. Total share-based compensation and related tax benefits were as follows:

	Three Months Ended	
	January 27, 2013	January 29, 2012
	(In millions)	
Share-based compensation	\$ 42	\$ 53
Tax benefit recognized	\$ 12	\$ 15

The effect of share-based compensation on the results of operations for the three months ended January 27, 2013 and January 29, 2012 was as follows:

	Three Months Ended	
	January 27, 2013	January 29, 2012
Cost of products sold	\$ 12	\$ 13
Research, development, and engineering	12	13
Selling, general and administrative	13	27
Restructuring charge	5	—
Total	<u>\$ 42</u>	<u>\$ 53</u>

The cost associated with share-based awards that are subject solely to time-based vesting requirements, less expected forfeitures, is recognized over the awards' service period for the entire award on a straight-line basis. The cost associated with performance-based equity awards is recognized for each tranche over the service period, based on an assessment of the likelihood that the applicable performance goals will be achieved.

At January 27, 2013, Applied had \$340 million in total unrecognized compensation expense, net of estimated forfeitures, related to grants of share-based awards and shares issued under Applied's ESPP, which will be recognized over a weighted average period of 2.8 years. At January 27, 2013, there were 182 million shares available for grants of share-based awards under the Employee Stock Incentive Plan, and an additional 47 million shares available for issuance under the ESPP.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

Stock Options

Applied grants options to purchase, at future dates, shares of its common stock to employees and consultants. The exercise price of each stock option equals the fair market value of Applied common stock on the date of grant. Options typically vest over three to four years, subject to the grantee's continued service with Applied through the scheduled vesting date, and expire no later than seven years from the grant date. The fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model. This model was developed for use in estimating the value of publicly traded options that have no vesting restrictions and are fully transferable. Applied employee stock options have characteristics significantly different from those of publicly traded options. There were no stock options granted during the three months ended January 27, 2013 and January 29, 2012. As part of the acquisition of Varian in the first quarter of fiscal 2012, stock options to purchase 5 million shares of Applied common stock were assumed.

Stock option activity for the three months ended January 27, 2013 was as follows:

	Shares	Weighted Average Exercise Price
	(In millions, except per share amounts)	
Outstanding at October 28, 2012	21	\$ 10.53
Granted	—	\$ —
Exercised	(2)	\$ 8.18
Canceled and forfeited	(4)	\$ 18.41
Outstanding at January 27, 2013	<u>15</u>	<u>\$ 9.17</u>
Exercisable at January 27, 2013	15	\$ 9.26

Restricted Stock Units, Restricted Stock, Performance Shares and Performance Units

Restricted stock units are converted into shares of Applied common stock upon vesting on a one-for-one basis. Restricted stock has the same rights as other issued and outstanding shares of Applied common stock except these shares generally have no right to dividends and are held in escrow until the award vests. Performance shares and performance units are awards that result in a payment to a grantee in shares of Applied common stock on a one-for-one basis if performance goals and/or other vesting criteria established by the Human Resources and Compensation Committee of Applied's Board of Directors (the Committee) are achieved or the awards otherwise vest. Restricted stock units, restricted stock, performance shares and performance units typically vest over four years and vesting is usually subject to the grantee's continued service with Applied and, in some cases, achievement of specified performance goals. The compensation expense related to the service-based awards is determined using the fair market value of Applied common stock on the date of the grant, and the compensation expense is recognized over the vesting period.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

Restricted stock, performance shares and performance units granted to certain executive officers are also subject to the achievement of specified performance goals (performance-based awards). These performance-based awards become eligible to vest only if performance goals are achieved and then actually will vest only if the grantee remains employed by Applied through each applicable vesting date. The fair value of these performance-based awards is estimated on the date of grant and assumes that the specified performance goals will be achieved. If the goals are achieved, these awards vest over a specified remaining service period of generally three or four years, provided that the grantee remain employed by Applied through each scheduled vesting date. If the performance goals are not met, no compensation expense is recognized and any previously recognized compensation expense is reversed. The expected cost of each award is reflected over the service period and is reduced for estimated forfeitures.

For performance-based awards granted during fiscal 2011 and 2010, the performance goals require (i) the achievement of targeted adjusted annual operating profit margin levels compared to Applied's peer companies in at least one of the four fiscal years beginning with the fiscal year of the grant, and (ii) that Applied's annual adjusted operating profit margin is positive in such year. Performance-based awards that do not become eligible to vest in a particular year may become eligible to vest in subsequent years up until the fourth fiscal year after grant, after which they are forfeited if the required performance goals have not been achieved.

In fiscal 2013 and fiscal 2012, the Committee granted performance-based awards that require the achievement of positive and relative adjusted operating profit margin goals in a manner generally similar to the previously granted performance-based awards. For the fiscal 2013 and fiscal 2012 awards, additional shares become eligible for time-based vesting if Applied achieves certain levels of total shareholder return (TSR) relative to a peer group comprised of companies in the Standard & Poor's 500 Information Technology Index measured at the end of a two-year period.

A summary of the performance-based awards approved by the Committee is presented below:

Fiscal Year Granted	Number of Performance-Based Awards Granted		Percent Earned as of January 27, 2013*
	Performance Shares/Performance Units	Shares of Restricted Stock	
	(in millions)		
2013	3	—	0%
2012	3	1	0%
2011	2	0.1	100%
2010	2	0.1	82%

* subject to additional time-based vesting requirements

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

A summary of the changes in restricted stock units, restricted stock, performance shares and performance units outstanding under Applied's equity compensation plans during the three months ended January 27, 2013 is presented below:

	Shares	Weighted Average Grant Date Fair Value	Weighted Average Remaining Contractual Term
	(In millions, except per share amounts)		
Non-vested restricted stock units, restricted stock, performance shares and performance units at October 28, 2012	36	\$ 11.53	2.6 Years
Granted	16	\$ 10.07	
Vested	(7)	\$ 11.45	
Canceled	(2)	\$ 11.34	
Non-vested restricted stock units, restricted stock, performance shares and performance units at January 27, 2013	<u>43</u>	<u>\$ 11.00</u>	3.0 Years

At January 27, 2013, 3 million additional performance-based awards could be earned upon certain levels of achievement of Applied's TSR relative to a peer group at a future date.

Employee Stock Purchase Plans

Under the ESPP, substantially all employees may purchase Applied common stock through payroll deductions at a price equal to 85 percent of the lower of the fair market value of Applied common stock at the beginning or end of each 6-month purchase period, subject to certain limits. No shares were issued during the three months ended January 27, 2013 and January 29, 2012. Compensation expense is calculated using the fair value of the employees' purchase rights under the Black-Scholes model.

Note 12 Employee Benefit Plans

Applied sponsors a number of employee benefit plans, including defined benefit plans of certain foreign subsidiaries, and a plan that provides certain medical and vision benefits to eligible retirees. A summary of the components of net periodic benefit costs of these defined and postretirement benefit plans for the three months ended January 27, 2013 and January 29, 2012 is presented below:

	Three Months Ended	
	January 27, 2013	January 29, 2012
	(In millions)	
Service cost	\$ 5	\$ 4
Interest cost	4	4
Expected return on plan assets	(3)	(3)
Amortization of actuarial loss	2	—
Net periodic benefit cost	<u>\$ 8</u>	<u>\$ 5</u>

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

Note 13 Income Taxes

Applied's effective income tax rate for the first quarter of fiscal 2013 was a benefit of 88.9 percent compared to a provision of 26.4 percent for the first quarter of fiscal 2012. The change in the rate for the first quarter of fiscal 2013 from the comparable period in the prior year was primarily due to an \$11 million benefit arising from the resolution of prior uncertainties related to Varian and a \$10 million benefit resulting from reinstatement of the U.S. federal research and development tax credit, retroactive to January 1, 2012. The tax rates were also affected by changes in composition of income in jurisdictions outside the U.S. with tax incentives. Applied's future effective income tax rate depends on various factors, such as tax legislation and the geographic composition of Applied's pre-tax income. Management carefully monitors these factors and timely adjusts the interim effective income tax rate accordingly.

The timing of the resolution of income tax examinations, as well as the amounts and timing of various tax payments that may be made as part of the resolution process, is highly uncertain and could cause an impact to Applied's consolidated results of operations. This could also cause large fluctuations in the balance sheet classification of current assets and non-current assets and liabilities. Applied does not expect a material change in unrecognized tax benefits in the next 12 months.

Note 14 Warranty, Guarantees and Contingencies**Warranty**

Changes in the warranty reserves during the three months ended January 27, 2013 and January 29, 2012 were as follows:

	Three Months Ended	
	January 27, 2013	January 29, 2012
	(In millions)	
Beginning balance	\$ 119	\$ 168
Provisions for warranty	24	30
Consumption of reserves	(34)	(37)
Ending balance	<u>\$ 109</u>	<u>\$ 161</u>

Applied products are generally sold with a warranty for a 12-month period following installation. The provision for the estimated cost of warranty is recorded when revenue is recognized. Parts and labor are covered under the terms of the warranty agreement. The warranty provision is based on historical experience by product, configuration and geographic region. Quarterly warranty consumption is generally associated with sales that occurred during the preceding four quarters, and quarterly warranty provisions are generally related to the current quarter's sales.

Guarantees

In the ordinary course of business, Applied provides standby letters of credit or other guarantee instruments to third parties as required for certain transactions initiated by either Applied or its subsidiaries. As of January 27, 2013, the maximum potential amount of future payments that Applied could be required to make under these guarantee agreements was approximately \$45 million. Applied has not recorded any liability in connection with these guarantee agreements beyond that required to appropriately account for the underlying transaction being guaranteed. Applied does not believe, based on historical experience and information currently available, that it is probable that any amounts will be required to be paid under these guarantee agreements.

Applied also has agreements with various banks to facilitate subsidiary banking operations worldwide, including overdraft arrangements, issuance of bank guarantees, and letters of credit. As of January 27, 2013, Applied Materials Inc. has provided parent guarantees to banks for approximately \$102 million to cover these arrangements.

Legal Matters*Jusung*

Applied has been engaged in several lawsuits and patent and administrative proceedings with Jusung Engineering Co., Ltd. and/or Jusung Pacific Co., Ltd. (Jusung) in Asia since 2003 involving technology used in manufacturing liquid crystal displays (LCDs). Applied believes that it has meritorious claims and defenses against Jusung that it intends to pursue vigorously.

In 2004, Applied filed a complaint for patent infringement against Jusung in the Hsinchu District Court in Taiwan seeking damages and a permanent injunction for infringement of a patent related to chemical vapor deposition (CVD) equipment. Jusung filed a counterclaim against Applied. On December 31, 2010, the Hsinchu District Court dismissed both actions, and appeals by both parties remain pending at the Taiwan Intellectual Property Court. Jusung unsuccessfully sought invalidation of Applied's CVD patent in the Taiwanese Intellectual Property Office (TIPO). In September 2010, the Taipei Supreme Administrative Court dismissed Jusung's appeal of the TIPO's decision. A second action filed by Jusung with the TIPO in 2009 seeking invalidation of Applied's CVD patent remains pending.

Korea Criminal Proceedings

In 2010, the Seoul Eastern District Court began hearings on indictments brought by the Seoul Prosecutor's Office for the Eastern District of Korea (the Prosecutor's Office) alleging that employees of several companies improperly received and used confidential information belonging to Samsung Electronics Co., Ltd. (Samsung), a major Applied customer based in Korea. The individuals charged included the former head of Applied Materials Korea (AMK), who at the time of the indictment was a vice president of Applied Materials, Inc., and certain other AMK employees. Neither Applied nor any of its subsidiaries was named as a party to the proceedings. Hearings on these matters concluded in November 2012 and the Court issued its decision on February 7, 2013. As part of the ruling, nine AMK employees (including the former head of AMK) were acquitted of all charges, while one AMK employee was found guilty on some of the charges and received a suspended jail sentence. The Prosecutor's Office has filed notices of appeal.

Other Matters

From time to time, Applied receives notification from third parties, including customers and suppliers, seeking indemnification, litigation support, payment of money or other actions by Applied in connection with claims made against them. In addition, from time to time, Applied receives notification from third parties claiming that Applied may be or is infringing or misusing their intellectual property or other rights. Applied also is subject to various other legal proceedings and claims, both asserted and unasserted, that arise in the ordinary course of business.

Although the outcome of the above-described matters or these claims and proceedings cannot be predicted with certainty, Applied does not believe that any of these proceedings or other claims will have a material adverse effect on its consolidated financial condition or results of operations.

Note 15 Industry Segment Operations

Applied's four reportable segments are: Silicon Systems Group, Applied Global Services, Display, and Energy and Environmental Solutions. As defined under the accounting literature, Applied's chief operating decision-maker are both the Chief Executive Officer and the President, who review operating results to make decisions about allocating resources and assessing performance for the entire Company. Segment information is presented based upon Applied's management organization structure as of January 27, 2013 and the distinctive nature of each segment. Future changes to this internal financial structure may result in changes to Applied's reportable segments.

Each reportable segment is separately managed and has separate financial results that are reviewed by Applied's chief operating decision-maker. Each reportable segment contains closely related products that are unique to the particular segment. Segment operating income is determined based upon internal performance measures used by Applied's chief operating decision-maker.

Applied derives the segment results directly from its internal management reporting system. The accounting policies Applied uses to derive reportable segment results are substantially the same as those used for external reporting purposes. Management measures the performance of each reportable segment based upon several metrics including orders, net sales and operating income. Management uses these results to evaluate the performance of, and to assign resources to, each of the reportable segments. Applied does not allocate to its reportable segments certain operating expenses that it manages separately at the corporate level, which include costs related to share-based compensation; certain management, finance, legal, human resources, and research, development and engineering functions provided at the corporate level; and unabsorbed information technology and occupancy. In addition, Applied does not allocate to its reportable segments restructuring and asset impairment charges and any associated adjustments related to restructuring actions, unless these charges or adjustments pertain to a specific reportable segment. Segment operating income excludes interest income/expense and other financial charges and income taxes. Management does not consider the unallocated costs in measuring the performance of the reportable segments.

The Silicon Systems Group segment includes semiconductor capital equipment for etch, rapid thermal processing, deposition, chemical mechanical planarization, metrology and inspection, wafer packaging, and ion implantation.

The Applied Global Services segment includes technically differentiated products and services to improve operating efficiency, reduce operating costs and lessen the environmental impact of semiconductor, display and solar customers' factories. Applied Global Services' products consist of spares, services, certain earlier generation products, remanufactured equipment, and products that have reached a particular stage in the product lifecycle. Customer demand for these products and services is fulfilled through a global distribution system with trained service engineers located in close proximity to customer sites.

The Display segment includes products for manufacturing LCDs, organic light-emitting diodes (OLEDs), and other display technologies for TVs, personal computers, tablets, smart phones, and other consumer-oriented devices.

The Energy and Environmental Solutions segment includes products for fabricating crystalline-silicon (c-Si) solar photovoltaic cells and modules, as well as high throughput roll-to-roll coating (web) systems for flexible electronics and other applications.

With the acquisition of Varian, Applied acquired ion implantation technology for c-Si solar cell manufacturing, which was recorded under the Silicon Systems Group segment in fiscal 2012. In fiscal 2013, Applied began marketing the solar implant products commercially through its Energy and Environmental Solutions segment. Accordingly, effective in the first quarter of fiscal 2013, Applied accounts for its solar implant products under the Energy and Environmental Solutions segment. The effect of the solar implant products was not material to the operations of either the Silicon Systems Group and Energy or Environmental Solutions segments.

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

Net sales and operating income (loss) for each reportable segment for the three months ended January 27, 2013 and January 29, 2012 were as follows:

	Net Sales	Operating Income (Loss)
	(In millions)	
Three months ended January 27, 2013:		
Silicon Systems Group	\$ 969	\$ 134
Applied Global Services	471	89
Display	87	3
Energy and Environmental Solutions	46	(54)
Total Segment	<u>\$ 1,573</u>	<u>\$ 172</u>
Three months ended January 29, 2012:		
Silicon Systems Group	\$ 1,344	\$ 271
Applied Global Services	534	107
Display	104	5
Energy and Environmental Solutions	207	(23)
Total Segment	<u>\$ 2,189</u>	<u>\$ 360</u>

Operating results for the three months ended January 27, 2013 included restructuring charges and asset impairments as discussed in detail in Note 10, Restructuring Charges and Asset Impairments.

Reconciliations of total segment operating results to Applied consolidated totals for the three months ended January 27, 2013 and January 29, 2012 were as follows:

	Three Months Ended	
	January 27, 2013	January 29, 2012
Total segment operating income	\$ 172	\$ 360
Corporate and unallocated costs	(129)	(181)
Restructuring charges and asset impairments	(4)	—
Income from operations	<u>\$ 39</u>	<u>\$ 179</u>

Corporate and unallocated costs for the three months ended January 29, 2012 included deal costs and other acquisition-related costs related to the Varian acquisition of \$36 million.

The following companies accounted for at least 10 percent of Applied's net sales for the three months ended January 27, 2013, which were for products in multiple reportable segments.

	Percentage of Net Sales
Taiwan Semiconductor Manufacturing Company Limited	30%
Samsung Electronics Co., Ltd.	16%
Intel Corporation	10%

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following management's discussion and analysis is provided in addition to the accompanying consolidated condensed financial statements and notes to assist in understanding Applied's results of operations and financial condition. Financial information as of January 27, 2013 should be read in conjunction with the financial statements for the fiscal year ended October 28, 2012 contained in the Company's Form 10-K filed December 5, 2012.

All statements in this report and those made by the management of Applied, other than statements of historical fact, are forward-looking statements. Examples of forward-looking statements include those regarding Applied's future financial or operating results, cash flows and cash deployment strategies, declaration of dividends, share repurchases, nature and impact of restructuring activities, business strategies, projected costs, products, competitive positions, management's plans and objectives for future operations, research and development, acquisitions and joint ventures, growth opportunities, customers, working capital, liquidity, investment portfolio and policies, and legal proceedings and claims, as well as industry trends and outlooks. Forward-looking statements may contain words such as "may," "will," "should," "could," "would," "expect," "plan," "anticipate," "believe," "estimate," "potential" and "continue," the negative of these terms, or other comparable terminology. These forward-looking statements are based on management's estimates, projections and assumptions as of the date hereof and include the assumptions that underlie such statements. Any expectations based on forward-looking statements are subject to risks and uncertainties and other important factors, including those discussed in Part II, Item 1A, "Risk Factors" below and elsewhere in this report. Other risks and uncertainties may be disclosed in Applied's prior Securities and Exchange Commission (SEC) filings. These and many other factors could affect Applied's future financial condition and operating results and could cause actual results to differ materially from expectations based on forward-looking statements made in this document or elsewhere by Applied or on its behalf. Applied undertakes no obligation to revise or update any forward-looking statements.

Overview

Applied provides manufacturing equipment, services and software to the global semiconductor, flat panel display, solar photovoltaic (PV) and related industries. Applied's customers include manufacturers of semiconductor wafers and chips, flat panel liquid crystal displays (LCDs), solar PV cells and modules, and other electronic devices. These customers may use what they manufacture in their own end products or sell the items to other companies for use in advanced electronic components. Applied operates in four reportable segments: Silicon Systems Group, Applied Global Services, Display, and Energy and Environmental Solutions. A summary of financial information for each reportable segment is found in Note 15 of Notes to Consolidated Condensed Financial Statements. A discussion of factors that could affect Applied's operations is set forth under "Risk Factors" in Item 1A, which is incorporated herein by reference. Product development and manufacturing activities occur primarily in United States, Europe, Israel and Asia. Applied's broad range of equipment and service products are highly technical and are sold primarily through a direct sales force.

Applied's results historically have been driven primarily by worldwide demand for semiconductors, which in turn depends on end-user demand for electronic products. Each of Applied's businesses is subject to highly cyclical industry conditions, as demand for manufacturing equipment and services can change depending on supply and demand for chips, LCDs, solar PVs and other electronic devices, as well as other factors, such as global economic and market conditions, and technological advances in fabrication processes. In light of this cyclicity, Applied's results can vary significantly year-over-year, as well as quarter-over-quarter.

The following table presents certain significant measurements for the periods indicated:

	Three Months Ended			Change	
	January 27, 2013	October 28, 2012	January 29, 2012	Q1 2013 over Q4 2012	Q1 2013 over Q1 2012
(In millions, except per share amounts and percentages)					
New orders	\$ 2,113	\$ 1,465	\$ 2,008	\$ 648	\$ 105
Net sales	\$ 1,573	\$ 1,646	\$ 2,189	\$ (73)	\$ (616)
Gross margin	\$ 582	\$ 586	\$ 786	\$ (4)	\$ (204)
Gross margin percent	37.0%	35.6 %	35.9%	1.4 points	1.1 points
Operating income	\$ 39	\$ (499)	\$ 179	\$ 538	\$ (140)
Operating margin percent	2.5%	(30.3)%	8.2%	32.8 points	(5.7) points
Net income	\$ 34	\$ (515)	\$ 117	\$ 549	\$ (83)
Earnings per diluted share	\$ 0.03	\$ (0.42)	\$ 0.09	\$ 0.45	\$ (0.06)
Non-GAAP Adjusted Results					
Non-GAAP adjusted gross margin	\$ 626	\$ 632	\$ 890	\$ (6)	\$ (264)
Non-GAAP adjusted gross margin percent	39.8%	38.4 %	40.7%	1.4 points	(0.9) points
Non-GAAP adjusted operating income	\$ 112	\$ 114	\$ 344	\$ (2)	\$ (232)
Non-GAAP adjusted operating margin percent	7.1%	6.9 %	15.7%	0.2 points	(8.6) points
Non-GAAP adjusted net income	\$ 69	\$ 70	\$ 240	\$ (1)	\$ (171)
Non-GAAP adjusted earnings per diluted share	\$ 0.06	\$ 0.06	\$ 0.18	\$ —	\$ (0.12)

Reconciliations of non-GAAP adjusted measures are presented under "Non-GAAP Adjusted Results" below. Fiscal 2013 and 2012 each contain 52 weeks, and the first quarter of both fiscal years each contained 13 weeks.

The first quarter of fiscal 2013 was characterized by increased orders for semiconductor equipment, which is Applied's largest business, led by foundry customers. Mobility, connectivity and cloud computing trends continued to drive semiconductor industry spending, with mobility as the largest influence. Mobility also continued to represent a major portion of display industry spending. While demand for LCD TV manufacturing capacity has begun to show signs of improvement, customers remain conservative with investment plans largely depending on the macro environment. In the solar industry, the first quarter of fiscal 2013 was characterized by continued excess manufacturing capacity and investment in fabrication equipment remained low.

Results of Operations

New Orders

New orders by reportable segment for the periods indicated were as follows:

	Three Months Ended						Change	
	January 27, 2013		October 28, 2012		January 29, 2012		Q1 2013 over Q4 2012	Q1 2013 over Q1 2012
	(In millions, except percentages)							
Silicon Systems Group	\$ 1,363	64%	\$ 741	51%	\$ 1,418	70%	84%	(4)%
Applied Global Services	544	26%	576	39%	517	26%	(6)%	5%
Display	138	7%	83	6%	40	2%	66%	245%
Energy and Environmental Solutions	68	3%	65	4%	33	2%	5%	106%
Total	\$ 2,113	100%	\$ 1,465	100%	\$ 2,008	100%	44%	5%

New orders for the first quarter of fiscal 2013 increased compared to the prior quarter, with substantially all of the increase attributable to higher demand for semiconductor equipment, led by foundry customers. Demand for LCD TV equipment during the first quarter of fiscal 2013 also contributed to the increase in new orders. The Silicon Systems Group's proportion of total new orders relative to other segments also increased compared to the prior quarter.

New orders for the first quarter of fiscal 2013 slightly increased compared to the first quarter of fiscal 2012, as a result of demand from Display and Energy and Environmental Solutions customers improving from the low level of orders for the same period in the prior year.

New orders by geographic region, determined by the product shipment destination specified by the customer, were as follows:

	Three Months Ended						Change	
	January 27, 2013		October 28, 2012		January 29, 2012		Q1 2013 over Q4 2012	Q1 2013 over Q1 2012
	(In millions, except percentages)							
Taiwan	\$ 906	43%	\$ 390	27%	\$ 367	18%	132%	147%
China	238	11%	102	7%	82	4%	133%	190%
Korea	198	9%	115	8%	666	33%	72%	(70)%
Japan	181	9%	184	12%	167	8%	(2)%	8%
Southeast Asia	65	3%	74	5%	50	3%	(12)%	30%
Asia Pacific	1,588	75%	865	59%	1,332	66%	84%	19%
United States	391	19%	435	30%	467	23%	(10)%	(16)%
Europe	134	6%	165	11%	209	11%	(19)%	(36)%
Total	\$ 2,113	100%	\$ 1,465	100%	\$ 2,008	100%	44%	5%

The increase in new orders from customers in Taiwan, China and Korea in the first quarter of fiscal 2013 compared to the prior quarter primarily reflected higher demand for semiconductor equipment from foundry and memory customers, as well as increased demand for LCD TV equipment.

The increase in new orders from customers in China in the first quarter of fiscal 2013 compared to the same period in the prior year was primarily due to improved demand for display equipment, while changes in orders from customers in Taiwan, Korea, United States and Europe were primarily attributable to changes in customer mix.

Changes in backlog during the three months ended January 27, 2013 were as follows:

	January 27, 2013
	(In millions)
Beginning balance	\$ 1,606
New orders	2,113
Net sales	(1,573)
Net adjustments (customer cancellations)	(40)
Ending balance	\$ 2,106

Backlog consists of: (1) orders for which written authorizations have been accepted and assigned shipment dates are within the next 12 months, or shipment has occurred but revenue has not been recognized; and (2) contractual service revenue and maintenance fees to be earned within the next 12 months. Applied's backlog at any particular time is not necessarily indicative of actual sales for any future periods, due to the potential for customer changes in delivery schedules or cancellation of orders. Approximately 75 percent of the backlog as of the end of the first quarter of fiscal 2013 is anticipated to be shipped within the next two quarters of fiscal 2013.

Backlog by reportable segment as of the most recent three fiscal quarters was as follows:

	January 27, 2013		October 28, 2012		July 29, 2012		Q1 2013 over Q4 2012	Q1 2013 over Q3 2012
	(In millions, except percentages)							
Silicon Systems Group	\$ 1,076	51%	\$ 705	44%	\$ 853	47%	53%	26%
Applied Global Services	633	30%	580	36%	641	35%	9%	(1)%
Display	246	12%	206	13%	216	12%	19%	14%
Energy and Environmental Solutions	151	7%	115	7%	111	6%	31%	36%
Total	\$ 2,106	100%	\$ 1,606	100%	\$ 1,821	100%	31%	16%

Backlog increased across all segments in the first quarter of fiscal 2013 from the prior quarter, the majority of which was due to demand for semiconductor equipment. In the first quarter of fiscal 2013, approximately 71 percent of net sales in the Silicon Systems Group, Applied's largest business segment, were for orders received and shipped within the quarter, up from 53 percent in the fourth quarter of fiscal 2012.

Net Sales

Net sales by reportable segment for the periods indicated were as follows:

	Three Months Ended						Change	
	January 27, 2013		October 28, 2012		January 29, 2012		Q1 2013 over Q4 2012	Q1 2013 over Q1 2012
	(In millions, except percentages)							
Silicon Systems Group	\$ 969	62%	\$ 870	53%	\$ 1,344	61%	11%	(28)%
Applied Global Services	471	30%	621	38%	534	24%	(24)%	(12)%
Display	87	5%	93	5%	104	5%	(6)%	(16)%
Energy and Environmental Solutions	46	3%	62	4%	207	10%	(26)%	(78)%
Total	\$ 1,573	100%	\$ 1,646	100%	\$ 2,189	100%	(4)%	(28)%

For the first quarter of fiscal 2013 compared to the prior quarter, net sales decreased due to lower investments in c-Si solar and LCD TV equipment by solar and display customers, partially offset by increased investments in semiconductor equipment from foundry customers. In addition, net sales for the fourth quarter of fiscal 2012 included \$85 million in sales for a thin film solar production line. The Silicon Systems Group's relative share of total net sales increased compared to the prior quarter and remains the largest contributor of net sales.

For the first quarter of fiscal 2013 compared to the first quarter of fiscal 2012, net sales decreased across all segments due to lower investments in semiconductor equipment, spares and services, and LCD TV and c-Si equipment. The Silicon Systems Group and Applied Global Services comprised more than 80 percent of Applied's total net sales for all periods presented.

Net sales by geographic region, determined by the location of customers' facilities to which products were shipped, were as follows:

	Three Months Ended						Change	
	January 27, 2013		October 28, 2012		January 29, 2012		Q1 2013 over Q4 2012	Q1 2013 over Q1 2012
	(In millions, except percentages)							
Taiwan	\$ 565	36%	\$ 457	28%	\$ 489	22%	24%	16%
China	127	8%	192	11%	180	8%	(34)%	(29)%
Korea	205	13%	127	8%	628	29%	61%	(67)%
Japan	98	6%	129	8%	217	10%	(24)%	(55)%
Southeast Asia	58	4%	97	6%	79	4%	(40)%	(27)%
Asia Pacific	1,053	67%	1,002	61%	1,593	73%	5%	(34)%
United States	401	25%	373	23%	417	19%	8%	(4)%
Europe	119	8%	271	16%	179	8%	(56)%	(34)%
Total	\$ 1,573	100%	\$ 1,646	100%	\$ 2,189	100%	(4)%	(28)%

Gross Margin

Gross margins for the periods indicated were as follows:

	Three Months Ended						Change	
	January 27, 2013		October 28, 2012		January 29, 2012		Q1 2013 over Q4 2012	Q1 2013 over Q1 2012
	(In millions, except percentages)							
Gross margin	\$ 582	\$ 586	\$ 786	\$ (4)	\$ (204)			
Gross margin (% of net sales)	37.0%	35.6%	35.9%	1.4 points	1.1 points			
Non-GAAP Adjusted Results								
Non-GAAP adjusted gross margin	\$ 626	\$ 632	\$ 890	\$ (6)	\$ (264)			
Non-GAAP adjusted gross margin percent	39.8%	38.4%	40.7%	1.4 points	(0.9) points			

Reconciliations of non-GAAP adjusted measures are presented under "Non-GAAP Adjusted Results" below.

Gross margin and non-GAAP adjusted gross margin increased in the first quarter of fiscal 2013 from the prior quarter due primarily to a higher mix of semiconductor equipment revenue and lower inventory charges. The gross margin and non-GAAP adjusted gross margin during the fourth quarter of fiscal 2012 benefited from the sale of a thin film solar production line, for which inventory had been fully reserved prior to fiscal 2012. Gross margin in the first quarter of fiscal 2013 also increased as compared to the first quarter of fiscal 2012, primarily due to inventory fair value and other purchase accounting adjustments associated with the acquisition of Varian during the first quarter of fiscal 2012. Non-GAAP adjusted gross margin in the first quarter of fiscal 2013 slightly decreased compared to the same period in the prior year reflecting lower net sales. Gross margin and non-GAAP adjusted gross margin during the three months ended January 27, 2013, October 28, 2012 and January 29, 2012 included \$12 million, \$14 million and \$13 million, of share-based compensation expense, respectively.

Research, Development and Engineering

Research, Development and Engineering (RD&E) expenses for the periods indicated were as follows:

	Three Months Ended			Change	
	January 27, 2013	October 28, 2012	January 29, 2012	Q1 2013 over Q4 2012	Q1 2013 over Q1 2012
	(In millions)				
Research, development and engineering	\$ 304	\$ 303	\$ 304	\$ 1	\$ —

Applied's future operating results depend to a considerable extent on its ability to maintain a competitive advantage in the equipment and service products it provides. Applied believes that it is critical to continue to make substantial investments in RD&E to assure the availability of innovative technology that meets the current and projected requirements of its customers' most advanced designs. Applied historically has maintained its commitment to investing in RD&E in order to continue to offer new products and technologies. RD&E remained essentially flat in the first quarter of fiscal 2013 compared to the prior quarter and the same period in the prior year as the Company continues to focus on priority R&D projects. As a result of the Company's actions, including workforce reductions and reprioritization of existing spending, Applied expects to increase funding for investments in technical capabilities and critical R&D programs in current and new markets. Development cycles range from 12 to 36 months depending on whether the product is an enhancement of an existing product, which typically has a shorter development cycle, or a new product, which typically has a longer development cycle. Most of Applied's existing products resulted from internal development activities and innovations involving new technologies, materials and processes. In certain instances, Applied acquires technologies, either in existing or new product areas, to complement its existing technology capabilities and to reduce time to market. RD&E expense during the three months ended January 27, 2013, October 28, 2012 and January 29, 2012 included \$12 million, \$14 million and \$13 million of share-based compensation expense, respectively.

Selling, General and Administrative

Selling, general and administrative (SG&A) expenses for the periods indicated were as follows:

	Three Months Ended			Change	
	January 27, 2013	October 28, 2012	January 29, 2012	Q1 2013 over Q4 2012	Q1 2013 over Q1 2012
	(In millions)				
Selling, general and administrative	\$ 230	\$ 237	\$ 303	\$ (7)	\$ (73)

SG&A expenses for the first quarter of fiscal 2013 decreased slightly from the prior quarter due to additional savings from temporary shutdowns, a favorable adjustment to the allowance for doubtful accounts, and lower share-based compensation due to workforce reductions as part of the previously announced restructuring plans, while SG&A expenses for the fourth quarter of fiscal 2012 included a favorable variable compensation adjustment and a provision for doubtful accounts. The decrease in SG&A expenses for the first quarter of fiscal 2013 compared to the same period in fiscal 2012 was primarily attributable to the absence of \$23 million of deal costs and \$19 million of share-based compensation for accelerated vesting of certain awards associated with the acquisition of Varian. SG&A expenses during the three months ended January 27, 2013, October 28, 2012 and January 29, 2012 included \$13 million, \$16 million and \$27 million of share-based compensation, respectively.

Restructuring and Asset Impairments

Restructuring and asset impairment expenses for the periods indicated were as follows:

	Three Months Ended			Change	
	January 27, 2013	October 28, 2012	January 29, 2012	Q1 2013 over Q4 2012	Q1 2013 over Q1 2012
	(In millions)				
Restructuring and asset impairments, net	\$ 9	\$ 124	\$ —	\$ (115)	\$ 9

On October 3, 2012, Applied announced a restructuring plan (the 2012 Global Restructuring Plan) to realign its global workforce and enhance its ability to invest for growth. Under this plan, Applied implemented a voluntary retirement program and other workforce reduction actions that are expected to affect approximately 900 to 1,300 positions, or 6 percent to 9 percent of its global workforce. Applied expects to incur aggregate pre-tax restructuring charges comprised of severance and other termination benefits in the range of \$120 million to \$160 million (including costs incurred to date of \$110 million discussed below), which is below the original estimate of \$180 million to \$230 million. The change in the estimate is primarily due to lower relative participation in the voluntary retirement program and a reduced estimate of the final cost of benefits. The change in the range of estimated pre-tax restructuring costs of this plan did not have an effect on the restructuring charges recognized to date. The Company expects annual savings and headcount reductions to be within the ranges originally provided.

During the first quarter of fiscal 2013, Applied recognized \$4 million of employee-related costs in connection with the 2012 Global Restructuring Plan due primarily to accelerated vesting of certain stock awards as part of the voluntary retirement program. These costs were not allocated to the segments. During the fourth quarter of fiscal 2012, severance and other termination benefits of \$106 million was recognized related to this plan. As of January 27, 2013, severance and other termination benefits of \$110 million have been incurred since the inception of this plan.

On May 10, 2012, Applied announced a plan (the 2012 EES Restructuring Plan) to restructure its Energy and Environmental Solutions segment in light of challenging industry conditions affecting the solar photovoltaic and light-emitting diode (LED) equipment markets. As of January 27, 2013, as part of the 2012 EES Restructuring Plan, Applied was in the process of relocating certain manufacturing, business operations and customer support functions of its precision wafering systems business, and had ceased LED development activities. During the first quarter of fiscal 2013, Applied incurred asset impairment charges of \$3 million related to this plan. During the fourth quarter of fiscal 2012, restructuring and asset impairment charges of \$12 million were recognized related to this plan. As of January 27, 2013, total costs incurred in implementing this plan totaled \$64 million, of which \$13 million were inventory-related charges.

Also, during the first quarter of fiscal 2013 and prior quarter, Applied incurred severance costs of \$2 million and \$6 million, respectively, associated with the integration of Varian.

For further details, see Note 10 of Notes to Consolidated Condensed Financial Statements.

Interest and Other Expenses

Interest and other expenses for the periods indicated were as follows:

	Three Months Ended			Change	
	January 27, 2013	October 28, 2012	January 29, 2012	Q1 2013 over Q4 2012	Q1 2013 over Q1 2012
	(In millions)				
Interest and other expense	\$ 24	\$ 24	\$ 24	\$ —	\$ —

Interest and other expense remained flat in the first quarter of fiscal 2013 compared to the prior quarter and to the first quarter of fiscal 2012. Interest expenses incurred were primarily associated with the senior unsecured notes issued in June 2011.

Interest and Other Income, net

Interest and other income, net for the periods indicated was as follows:

	Three Months Ended			Change	
	January 27, 2013	October 28, 2012	January 29, 2012	Q1 2013 over Q4 2012	Q1 2013 over Q1 2012
	(In millions)				
Interest and other income, net	\$ 3	\$ 5	\$ 4	\$ (2)	\$ (1)

The decrease in interest and other income in the first quarter of fiscal 2013 compared to the prior quarter and to the comparable period in fiscal 2012 was due to lower cash and investment balances as a result of increased cash requirements for severance and variable compensation programs during the first quarter of fiscal 2013.

Income Taxes

Income tax expenses for the periods indicated were as follows:

	Three Months Ended			Change	
	January 27, 2013	October 28, 2012	January 29, 2012	Q1 2013 over Q4 2012	Q1 2013 over Q1 2012
	(In millions, except percentages)				
Provision (benefit) for income taxes	\$ (16)	\$ (17)	\$ 42	\$ 1	\$ (58)
Effective income tax rate	(88.9)%	3.2%	26.4%	(92.1) points	(115.3) points

The effective income tax rate for the first quarter of fiscal 2013 was a benefit of 88.9 percent, which included an \$11 million benefit resulting from the resolution of prior uncertainties related to Varian and a \$10 million benefit resulting from reinstatement of U.S. federal research and development tax credit, retroactive to January 1, 2012. The effective income tax rate for the fourth quarter of fiscal 2012 was a benefit of 3.2 percent, reflecting the exclusion of the effects of goodwill impairment charges, which are not deductible for tax purposes. The tax rates for the periods presented were also affected by changes in composition of income in jurisdictions outside the U.S. with tax incentives. Applied's effective income tax rate depends on various factors, such as tax legislation and the geographic composition of Applied's pre-tax income.

Segment Information

Applied reports financial results in four segments: Silicon Systems Group, Applied Global Services, Display, and Energy and Environmental Solutions. A description of the products and services, as well as financial data, for each reportable segment can be found in Note 15 of Notes to Consolidated Condensed Financial Statements. Applied does not allocate to its reportable segments certain operating expenses that it manages separately at the corporate level. These unallocated costs include costs for share-based compensation; certain management, finance, legal, human resources, and RD&E functions provided at the corporate level; and unabsorbed information technology and occupancy. In addition, Applied does not allocate to its reportable segments restructuring and asset impairment charges and any associated adjustments related to restructuring actions, unless these charges or adjustments pertain to a specific reportable segment.

The results for each reportable segment are discussed below.

Silicon Systems Group Segment

The Silicon Systems Group segment includes semiconductor capital equipment for deposition, etch, ion implantation, rapid thermal processing, chemical mechanical planarization, metrology and inspection, and wafer packaging. Development efforts are focused on solving customers' key technical challenges in transistor, patterning, interconnect and packaging performance as devices scale to advanced technology nodes. The mobility trend remains the largest influence on industry spending, as it drives device manufacturers to deliver high-performance, low-power processors and affordable solid-state storage in a small form factor.

The competitive environment for the Silicon Systems Group in the first quarter of fiscal 2013 reflected continued investment in the semiconductor industry driven by capacity demand for mobile computing. Foundry customers led capacity additions for advanced technology nodes and were the primary drivers for net sales of the Silicon Systems Group. Investment by DRAM customers remained low in the period due to lack of profitability and oversupply conditions in the DRAM memory market.

With the acquisition of Varian, Applied acquired ion implantation technology for c-Si solar cell manufacturing which was recorded under the Silicon Systems Group segment in fiscal 2012. In fiscal 2013, Applied began marketing the solar implant products commercially through its Energy and Environmental Solutions segment. Accordingly, effective in the first quarter of fiscal 2013, Applied accounts for its solar implant products under the Energy and Environmental Solutions segment. The effect of the solar implant products was not material to the operations of either the Silicon Systems Group or Energy and Environmental Solutions segments.

Certain significant measures for the periods indicated were as follows:

	Three Months Ended			Change			
	January 27, 2013	October 28, 2012	January 29, 2012	Q1 2013 over Q4 2012	Q1 2013 over Q1 2012		
	(In millions, except percentages and ratios)						
New orders	\$ 1,363	\$ 741	\$ 1,418	\$ 622	84%	\$ (55)	(4)%
Net sales	969	870	1,344	99	11%	(375)	(28)%
Book to bill ratio	1.4	0.9	1.1				
Operating income	134	41	271	93	227%	(137)	(51)%
Operating margin	13.8%	4.7%	20.2%		9.1 points		(6.4) points
Non-GAAP Adjusted Results							
Non-GAAP adjusted operating income	\$ 180	\$ 95	\$ 386	85	89%	(206)	(53)%
Non-GAAP adjusted operating margin percent	18.6%	10.9%	28.7%		7.7 points		(10.1) points

Reconciliations of non-GAAP adjusted measures are presented under "Non-GAAP Adjusted Results" below.

New orders for the Silicon Systems Group by end use application for the three months ended January 27, 2013, October 28, 2012 and January 29, 2012 were as follows:

	Three Months Ended		
	January 27, 2013	October 28, 2012	January 29, 2012
Foundry	73%	47%	57%
Memory	15%	13%	29%
Logic and other	12%	40%	14%
	100%	100%	100%

New orders for the first quarter of fiscal 2013 increased compared to the prior quarter primarily due to increased demand from foundry and memory customers, partially offset by lower demand from logic customers. Net sales for the first quarter of fiscal 2013 increased compared to the prior quarter primarily due to increased investments from foundry customers, partially offset by lower investments from memory customers. Approximately 71 percent of net sales in the first quarter of fiscal 2013 were for orders received and shipped within the quarter. Operating income and non-GAAP adjusted operating income also increased in the first quarter of fiscal 2013 compared to the prior quarter, reflecting an increase in net sales, lower inventory charges and changes in product mix. Three customers accounted for approximately 75 percent of this segment's total new orders and net sales for the first quarter of fiscal 2013.

New orders for the first quarter of fiscal 2013 decreased compared to the same period in fiscal 2012 mainly due to lower demand from memory customers, partially offset by increased demand from foundry customers. Net sales during the current quarter decreased compared to the same period in fiscal 2012 due mostly to decreased sales to memory customers. Operating income and non-GAAP adjusted operating income decreased in the first quarter of fiscal 2013 compared to the first quarter of fiscal 2012, reflecting a decrease in net sales and an unfavorable product mix.

The following regions accounted for at least 30 percent of total net sales for the Silicon Systems Group segment for one or more of the periods indicated:

	Three Months Ended						Change	
	January 27, 2013		October 28, 2012		January 29, 2012		Q1 2013 over Q4 2012	Q1 2013 over Q1 2012
	(In millions, except percentages)							
Taiwan	\$ 462	48%	\$ 316	36%	\$ 275	20%	46%	68%
Korea	\$ 116	12%	\$ 49	6%	\$ 552	41%	137%	(79)%

Applied Global Services Segment

The Applied Global Services segment encompasses spares, upgrades, services, remanufactured earlier generation equipment and factory automation software for semiconductor, display and solar manufacturing. These products are designed to improve customers' operating efficiency, optimize their operating costs, and lessen the environmental impact of their factories. Customer demand for products and services is fulfilled through a global distribution system with trained service engineers located in close proximity to customer sites.

Industry conditions that affected Applied Global Services' sales of spares and services during the first quarter of fiscal 2013 were principally lower semiconductor manufacturers' wafer starts as well as utilization rates.

Certain significant measures for the periods indicated were as follows:

	Three Months Ended			Change	
	January 27, 2013	October 28, 2012	January 29, 2012	Q1 2013 over Q4 2012	Q1 2013 over Q1 2012
(In millions, except percentages and ratios)					
New orders	\$ 544	\$ 576	\$ 517	\$ (32) (6)%	\$ 27 5%
Net sales	471	621	534	(150) (24)%	(63) (12)%
Book to bill ratio	1.2	0.9	1.0		
Operating income	89	164	107	(75) (46)%	(18) (17)%
Operating margin	18.9%	26.4%	20.0%	(7.5) points	(1.1) points
Non-GAAP Adjusted Results					
Non-GAAP adjusted operating income	91	171	113	(80) (47)%	(22) (19)%
Non-GAAP adjusted operating margin percent	19.3%	27.5%	21.2%	(8.2) points	(1.9) points

Reconciliations of non-GAAP adjusted measures are presented under "Non-GAAP Adjusted Results" below.

New orders for the first quarter of fiscal 2013 decreased compared to the prior quarter primarily due to decreased demand in 200mm systems and semiconductor spares, partially offset by an increase in orders for services. The decrease in net sales, operating income and non-GAAP adjusted operating income for the first quarter of fiscal 2013 from the prior quarter was mostly due to the \$85 million in sales for a thin film solar production line included in the fourth quarter of fiscal 2012, for which inventory had been fully reserved prior to fiscal 2012. Operating income for the first quarter of fiscal 2013 and fourth quarter of fiscal 2012 included restructuring and asset impairment charges of \$1 million and \$4 million, respectively, associated with the 2012 EES Restructuring Plan and the integration of Varian.

New orders for the first quarter of fiscal 2013 increased compared to the same period in fiscal 2012 mainly attributable to increased demand for semiconductor services. Net sales for the first quarter of fiscal 2013 decreased compared to the same period in fiscal 2012 primarily due to lower sales of 200mm systems, semiconductor spares and services. Operating income and non-GAAP adjusted operating income decreased in the first quarter of fiscal 2013, reflecting the decrease in net sales.

There was no individual region that accounted for at least 30 percent of total net sales for the Applied Global Services segment for any of the periods presented.

Display Segment

The Display segment encompasses products for manufacturing LCDs, OLEDs, and other display technologies for TVs, personal computers (PCs), tablets, smart phones, and other consumer-oriented devices. The segment is focused on expanding market share by differentiation with larger-scale manufacturing equipment for TVs, entry into new markets such as the low-temperature polysilicon (LTPS), metal oxide, and touch panel sectors, and development of products that enable cost reductions through productivity and uniformity. Historically, display industry growth has depended primarily on consumer demand for increasingly larger and more advanced LCD TVs, for which demand has slowed significantly. More recently, mobility-related markets have represented the majority of this segment's orders and net sales.

The market environment for Applied's Display segment in the first quarter of fiscal 2013 was characterized by continued demand for touch screen and high-end mobile devices. Capacity requirements for LCD TVs have begun to show signs of improvement, however customers remain conservative with investment plans.

Certain significant measures for the periods indicated were as follows:

	Three Months Ended			Change			
	January 27, 2013	October 28, 2012	January 29, 2012	Q1 2013 over Q4 2012	Q1 2013 over Q1 2012		
(In millions, except percentages and ratios)							
New orders	\$ 138	\$ 83	\$ 40	\$ 55	66%	\$ 98	245%
Net sales	87	93	104	(6)	(6)%	(17)	(16)%
Book to bill ratio	1.6	0.9	0.4				
Operating income	3	3	5	—	—%	(2)	(40)%
Operating margin	3.4%	3.2%	4.8%		0.2 points		(1.4) points
Non-GAAP Adjusted Results							
Non-GAAP adjusted operating income	\$ 5	\$ 4	\$ 7	1	25%	(2)	(29)%
Non-GAAP adjusted operating margin percent	5.7%	4.3%	6.7%		1.4 points		(1.0) points

Reconciliations of non-GAAP adjusted measures are presented under "Non-GAAP Adjusted Results" below.

New orders for the first quarter of fiscal 2013 increased compared to the prior quarter primarily due to increased demand for LCD TV equipment and continued demand for touch panel and LTPS systems. Net sales slightly decreased for the first quarter of fiscal 2013 compared to the prior quarter, with mobility-related products representing more than 80 percent of net sales. Display remained profitable and operating income remained flat during the first quarter of fiscal 2013 despite a low level of net sales. Operating income and non-GAAP adjusted operating income were primarily affected by changes in product mix. Two customers accounted for 99 percent of net sales for the Display segment in the first quarter of fiscal 2013.

New orders for the first quarter of fiscal 2013 increased compared to the same period in the prior year primarily due to increased demand for LCD TV equipment and increased demand for touch panel and LTPS systems. Net sales, operating income and non-GAAP adjusted operating income for the first quarter of fiscal 2013 decreased compared to the same period in fiscal 2012 primarily due to lower investments in LCD TV equipment, as the display industry was affected by the down cycle in fiscal 2012.

The following regions accounted for at least 30 percent of total net sales for the Display segment for one or more of the periods indicated:

	Three Months Ended						Change				
	January 27, 2013		October 28, 2012		January 29, 2012		Q1 2013 over Q4 2012	Q1 2013 over Q1 2012			
	(In millions, except percentages)										
Taiwan	\$	—	—%	\$	34	37%	\$	45	43%	(100)%	(100)%
Korea	\$	43	49%	\$	15	16%	\$	20	19%	187%	115%
China	\$	44	51%	\$	55	59%	\$	18	17%	(20)%	144%

Energy and Environmental Solutions Segment

The Energy and Environmental Solutions segment includes products for fabricating c-Si solar PVs, as well as high throughput roll-to-roll coating (web) systems for flexible electronics and other applications. This business is focused on delivering solutions to generate and conserve energy, with an emphasis on lowering the cost to produce solar power by providing equipment to enhance manufacturing scale and efficiency. While end-demand for solar PVs has been robust over the last several years, investment levels in capital equipment have experienced considerable volatility. Current global solar PV production capacity exceeds anticipated near-term demand, which has caused solar PV manufacturers to significantly reduce or delay investments in manufacturing capacity and new technology, or in some instances, to cease operations.

The solar PV industry environment in the first quarter of fiscal 2013 was characterized by continued excess manufacturing capacity despite continued growth in end-market demand. As a result, solar cell and wafering customers are deferring purchases of new capacity to preserve capital.

With the acquisition of Varian, Applied acquired ion implantation technology for c-Si solar cell manufacturing which was recorded under the Silicon Systems Group segment in fiscal 2012. In fiscal 2013, Applied began marketing the solar implant products commercially through its Energy and Environmental Solutions segment. Accordingly, effective in the first quarter of fiscal 2013, Applied accounts for its solar implant products under the Energy and Environmental Solutions segment. The effect of the solar implant products was not material to the operations of either the Silicon Systems Group or Energy and Environmental Solutions segments.

Certain significant measures for the periods indicated were as follows:

	Three Months Ended						Change					
	January 27, 2013		October 28, 2012		January 29, 2012		Q1 2013 over Q1 2012					
	(In millions, except percentages and ratios)											
New orders	\$	68	\$	65	\$	33	\$	3	5%	\$	35	106%
Net sales		46		62		207		(16)	(26)%		(161)	(78)%
Book to bill ratio		1.5		1.0		0.2						
Operating loss		(54)		(480)		(23)		426	89%		(31)	135%
Operating margin		(117.4)%		(774.2)%		(11.1)%		656.8 points			(106.3) points	
Non-GAAP Adjusted Results												
Non-GAAP adjusted operating income		(44)		(46)		(17)		2	4%		(27)	159%
Non-GAAP adjusted operating margin percent		(95.7)%		(74.2)%		(8.2)%		(21.5) points			(87.5) points	

Reconciliations of non-GAAP adjusted measures are presented under "Non-GAAP Adjusted Results" below.

Financial performance during the first quarter of fiscal 2013 continued to reflect the excess manufacturing capacity in the solar industry. More than 70 percent of new orders during the first quarter of fiscal 2013 and the fourth quarter of fiscal 2012 related to roll-to-roll deposition equipment. During the fourth quarter of fiscal 2012, Applied recorded a \$421 million goodwill impairment charge, which resulted in a lower operating loss in the first quarter of fiscal 2013 compared to the prior quarter. Non-GAAP adjusted operating loss decreased slightly on lower net sales due primarily to lower inventory charges and change in product mix. Three customers accounted for 40 percent of net sales for the Energy and Environmental Solutions segment in the first quarter of fiscal 2013. Operating income for the first quarter of fiscal 2013 and fourth quarter of fiscal 2012 included restructuring and asset impairment charges of \$3 million and \$6 million, respectively, associated with the 2012 EES Restructuring Plan.

New orders increased for the first quarter of fiscal 2013 compared to the low level of orders in the same period in fiscal 2012 primarily due to increased demand for roll-to-roll deposition equipment. Net sales, operating income and non-GAAP adjusted operating income for the first quarter of fiscal 2013 decreased compared to the same period in fiscal 2012 primarily due to continued excess manufacturing capacity in the solar industry.

The following region accounted for at least 30 percent of total net sales for the Energy and Environmental Solutions segment for one or more of the past three fiscal years:

	Three Months Ended						Change	
	January 27, 2013		October 28, 2012		January 29, 2012		Q1 2013 over Q4 2012	Q1 2013 over Q1 2012
	(In millions, except percentages)							
Taiwan	\$ 7	15%	\$ 3	5%	\$ 92	44%	133%	(92)%
China	\$ 15	33%	\$ 39	63%	\$ 85	41%	(62)%	(82)%

Financial Condition, Liquidity and Capital Resources

Applied's cash, cash equivalents and investments consist of the following:

	January 27, 2013	October 28, 2012
	(In millions)	
Cash and cash equivalents	\$ 1,523	\$ 1,392
Short-term investments	230	545
Long-term investments	1,062	1,055
Total cash, cash-equivalents and investments	<u>\$ 2,815</u>	<u>\$ 2,992</u>

Applied's cash, cash equivalents and investments decreased to \$2.8 billion at January 27, 2013 from \$3.0 billion at October 28, 2012. A summary of cash provided by (used in) operating, investing, and financing activities is as follows:

	Three Months Ended	
	January 27, 2013	January 29, 2012
	(In millions)	
Cash provided by operating activities	\$ 16	\$ 181
Cash provided by (used in) investing activities	\$ 253	\$ (4,157)
Cash used in financing activities	\$ (138)	\$ (302)

The primary sources of cash from operating activities for the three months ended January 27, 2013 were net income, as adjusted to exclude the effect of non-cash charges including depreciation, amortization, share-based compensation, restructuring and asset impairments, deferred income taxes and changes in components of operating assets and liabilities. During the first quarter of fiscal 2013, Applied used cash for its existing restructuring plans and variable compensation programs. Applied did not utilize programs to discount letters of credit issued by customers during the three months ended January 27, 2013 and January 29, 2012. Discounting of letters of credit depends on many factors, including the willingness of financial institutions to discount the letters of credit and the cost of such arrangements. There was no factoring of accounts receivable or discounting of promissory notes during the three months ended January 27, 2013. Applied factored accounts receivable and discounted promissory notes of \$70 million during the three months ended January 29, 2012. Applied's working capital was \$2.8 billion both at January 27, 2013 and at October 28, 2012.

Days sales, inventory and payable outstanding at the end of each of the periods indicated are:

	January 27, 2013	October 28, 2012	January 29, 2012
Days sales outstanding	64	67	66
Days inventory outstanding	117	109	115
Days payable outstanding	39	34	31

Days sales outstanding varies due to the timing of shipments and the payment terms. Days sales outstanding decreased in the first quarter of fiscal 2013 compared to the prior quarter primarily due to better collection performance. Days inventory outstanding and days payable outstanding increased in the first quarter of fiscal 2013 compared to the prior quarter due to higher inventory and accounts payable balances, reflecting increased new orders and consequently higher inventory purchases that also increased accounts payable balances. Days inventory outstanding and days payable outstanding were also affected by lower sales during the quarter and consequently, lower cost of products sold.

Applied generated \$253 million of cash from investing activities during the three months ended January 27, 2013. Proceeds from sales and maturities of investments, net of purchases of investments, totaled \$302 million and capital expenditures were \$49 million during the three months ended January 27, 2013. During the three months ended January 29, 2012, Applied used \$4.2 billion in investing activities, primarily due to the acquisition of Varian.

Applied used cash for financing activities in the amount of \$138 million during the three months ended January 27, 2013, consisting primarily of \$108 million in payment of cash dividends to stockholders and \$48 million in repurchases of common stock, offset by proceeds from stock issuances related to equity compensation awards of \$18 million.

In December 2012, Applied's Board of Directors declared a quarterly cash dividend in the amount of \$0.09 per share that will be paid on March 13, 2013 to stockholders of record as of February 20, 2013. Applied currently anticipates that cash dividends will continue to be paid on a quarterly basis, although the declaration of any future cash dividend is at the discretion of the Board of Directors and will depend on Applied's financial condition, results of operations, capital requirements, business conditions and other factors, as well as a determination by the Board of Directors that cash dividends are in the best interests of Applied's stockholders.

Applied has credit facilities for unsecured borrowings in various currencies of up to \$1.6 billion, of which \$1.5 billion is comprised of a committed revolving credit agreement with a group of banks that is scheduled to expire in May 2016. This agreement provides for borrowings in United States dollars at interest rates keyed to one of the two rates selected by Applied for each advance and includes financial and other covenants with which Applied was in compliance at January 27, 2013. Remaining credit facilities in the amount of approximately \$91 million are with Japanese banks. Applied's ability to borrow under these facilities is subject to bank approval at the time of the borrowing request, and any advances will be at rates indexed to the banks' prime reference rate denominated in Japanese yen. No amounts were outstanding under any of these facilities at both January 27, 2013 and October 28, 2012 and Applied has not utilized these credit facilities.

Applied has debt agreements that contain financial and other covenants. These covenants require Applied to maintain certain minimum financial ratios. At January 27, 2013, Applied was in compliance with all such covenants. See Note 9 of Notes to Consolidated Condensed Financial Statements for additional discussion of long-term debt.

In the ordinary course of business, Applied provides standby letters of credit or other guarantee instruments to third parties as required for certain transactions initiated by either Applied or its subsidiaries. As of January 27, 2013, the maximum potential amount of future payments that Applied could be required to make under these guarantee agreements was approximately \$45 million. Applied has not recorded any liability in connection with these guarantee agreements beyond that required to appropriately account for the underlying transaction being guaranteed. Applied does not believe, based on historical experience and information currently available, that it is probable that any amounts will be required to be paid under these guarantee agreements.

Applied also has agreements with various banks to facilitate subsidiary banking operations worldwide, including overdraft arrangements, issuance of bank guarantees, and letters of credit. As of January 27, 2013, Applied Materials, Inc. has provided parent guarantees to banks for approximately \$102 million to cover these arrangements.

Applied's investment portfolio consists principally of investment grade money market mutual funds, U.S. Treasury and agency securities, municipal bonds, corporate bonds and mortgage-backed and asset-backed securities, as well as equity securities. Applied regularly monitors the credit risk in its investment portfolio and takes appropriate measures, which may include the sale of certain securities, to manage such risks prudently in accordance with its investment policies. During the three months ended January 27, 2013, Applied did not recognize any impairment of its marketable securities. At January 27, 2013, gross unrealized losses due to a decrease in the fair value of certain fixed income securities were not material.

During the three months ended January 27, 2013, Applied recorded a favorable adjustment of \$5 million to the allowance for doubtful accounts as a result of improvements in general risk exposure. While Applied believes that its allowance for doubtful accounts at January 27, 2013 is adequate, it will continue to closely monitor customer liquidity and economic conditions.

As of January 27, 2013, approximately \$1.2 billion of cash, cash equivalents, and marketable securities held by foreign subsidiaries may be subject to U.S. taxes if repatriated for U.S. operations. Of this amount, Applied intends to permanently reinvest approximately \$0.9 billion of these funds outside of the U.S. and does not plan to repatriate these funds. For the remaining cash, cash equivalents and marketable securities held by foreign subsidiaries, U.S. taxes have been provided for in the financial statements.

Although cash requirements will fluctuate based on the timing and extent of factors such as those discussed above, Applied's management believes that cash generated from operations, together with the liquidity provided by existing cash balances and borrowing capability, will be sufficient to satisfy Applied's liquidity requirements for the next 12 months. For further details regarding Applied's operating, investing and financing activities, see the Consolidated Condensed Statements of Cash Flows in this report.

Critical Accounting Policies and Estimates

The preparation of consolidated financial statements and related disclosures in conformity with accounting principles generally accepted in the United States of America requires management to make judgments, assumptions and estimates that affect the amounts reported. Note 1 of Notes to Consolidated Financial Statements in our Annual Report on Form 10-K and Note 1 of Notes to Consolidated Condensed Financial Statements in this report describe the significant accounting policies used in the preparation of the consolidated financial statements. Certain of these significant accounting policies are considered to be critical accounting policies.

A critical accounting policy is defined as one that is both material to the presentation of Applied's consolidated financial statements and that requires management to make difficult, subjective or complex judgments that could have a material effect on Applied's financial condition or results of operations. Specifically, these policies have the following attributes: (1) Applied is required to make assumptions about matters that are highly uncertain at the time of the estimate; and (2) different estimates Applied could reasonably have used, or changes in the estimate that are reasonably likely to occur, would have a material effect on Applied's financial condition or results of operations.

Estimates and assumptions about future events and their effects cannot be determined with certainty. Applied bases its estimates on historical experience and on various other assumptions believed to be applicable and reasonable under the circumstances. These estimates may change as new events occur, as additional information is obtained and as Applied's operating environment changes. These changes have historically been minor and have been included in the consolidated financial statements as soon as they became known. In addition, management is periodically faced with uncertainties, the outcomes of which are not within its control and will not be known for prolonged periods of time. These uncertainties include those discussed in Part II, Item 1A, "Risk Factors." Based on a critical assessment of its accounting policies and the underlying judgments and uncertainties affecting the application of those policies, management believes that Applied's consolidated financial statements are fairly stated in accordance with accounting principles generally accepted in the United States of America, and provide a meaningful presentation of Applied's financial condition and results of operations.

Management believes that the following are critical accounting policies and estimates:

Revenue Recognition

Applied recognizes revenue when all four revenue recognition criteria have been met: persuasive evidence of an arrangement exists; delivery has occurred or services have been rendered; sales price is fixed or determinable; and collectability is probable. Each sale arrangement may contain commercial terms that differ from other arrangements. In addition, Applied frequently enters into contracts that contain multiple deliverables. Judgment is required to properly identify the accounting units of the multiple deliverable transactions and to determine the manner in which revenue should be allocated among the accounting units. Moreover, judgment is used in interpreting the commercial terms and determining when all criteria of revenue recognition have been met in order for revenue recognition to occur in the appropriate accounting period. While changes in the allocation of the estimated sales price between the units of accounting will not affect the amount of total revenue recognized for a particular sales arrangement, any material changes in these allocations could impact the timing of revenue recognition, which could have a material effect on Applied's financial condition and results of operations.

Warranty Costs

Applied provides for the estimated cost of warranty when revenue is recognized. Estimated warranty costs are determined by analyzing specific product, current and historical configuration statistics and regional warranty support costs. Applied's warranty obligation is affected by product and component failure rates, material usage and labor costs incurred in correcting product failures during the warranty period. As Applied's customer engineers and process support engineers are highly trained and deployed globally, labor availability is a significant factor in determining labor costs. The quantity and availability of critical replacement parts is another significant factor in estimating warranty costs. Unforeseen component failures or exceptional component performance can also result in changes to warranty costs. If actual warranty costs differ substantially from Applied's estimates, revisions to the estimated warranty liability would be required, which could have a material adverse effect on Applied's business, financial condition and results of operations.

Allowance for Doubtful Accounts

Applied maintains an allowance for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. This allowance is based on historical experience, credit evaluations, specific customer collection history and any customer-specific issues Applied has identified. Changes in circumstances, such as an unexpected material adverse change in a major customer's ability to meet its financial obligation to Applied or its payment trends, may require Applied to further adjust its estimates of the recoverability of amounts due to Applied, which could have a material adverse effect on Applied's business, financial condition and results of operations.

Inventory Valuation

Inventories are generally stated at the lower of cost or market, with cost determined on a first-in, first-out basis. The carrying value of inventory is reduced for estimated obsolescence by the difference between its cost and the estimated market value based upon assumptions about future demand. Applied evaluates the inventory carrying value for potential excess and obsolete inventory exposures by analyzing historical and anticipated demand. In addition, inventories are evaluated for potential obsolescence due to the effect of known and anticipated engineering change orders and new products. If actual demand were to be substantially lower than estimated, additional adjustments for excess or obsolete inventory may be required, which could have a material adverse effect on Applied's business, financial condition and results of operations.

Goodwill and Intangible Assets

Applied reviews goodwill and intangible assets for impairment whenever events or changes in circumstances indicate that the carrying amount of these assets may not be recoverable, and also annually reviews goodwill and intangibles with indefinite lives for impairment. Intangible assets, such as purchased technology, are generally recorded in connection with a business acquisition. The value assigned to intangible assets is usually based on estimates and judgments regarding expectations for the success and life cycle of products and technology acquired. If actual product acceptance differs significantly from the estimates, Applied may be required to record an impairment charge to reduce the carrying value of the reporting unit to its realizable value. The fair value of a reporting unit is estimated using both the income approach and the market approach taking into account such factors as future anticipated operating results and estimated cost of capital. Management uses significant judgment when assessing goodwill for potential impairment, especially in emerging markets. A severe decline in market value could result in an unexpected impairment charge for impaired goodwill, which could have a material adverse effect on Applied's business, financial condition and results of operations.

Income Taxes

The effective tax rate is highly dependent upon the geographic composition of worldwide earnings, tax regulations governing each region, non-tax deductible expenses incurred in connection with acquisitions and availability of tax credits. Management carefully monitors the changes in many factors and adjusts the effective income tax rate as required. If actual results differ from these estimates, Applied could be required to record a valuation allowance on deferred tax assets or adjust its effective income tax rate, which could have a material adverse effect on Applied's business, financial condition and results of operations.

Applied accounts for income taxes by recognizing deferred tax assets and liabilities using statutory tax rates for the effect of temporary differences between the book and tax bases of recorded assets and liabilities, net operating losses and tax credit carryforwards. Deferred tax assets are also reduced by a valuation allowance if it is more likely than not that a portion of the deferred tax asset will not be realized. Management has determined that it is more likely than not that Applied's future taxable income will be sufficient to realize its deferred tax assets, net of existing valuation allowance.

The calculation of tax liabilities involves significant judgment in estimating the impact of uncertainties in the application of complex tax laws. Resolution of these uncertainties in a manner inconsistent with Applied's expectations could have a material impact on Applied's results of operations and financial condition.

Non-GAAP Adjusted Results

Management uses non-GAAP adjusted results to evaluate operating and financial performance in light of business objectives and for planning purposes. Applied believes these measures enhance investors' ability to review the Company's business from the same perspective as management and facilitate comparisons of this period's results with prior periods. The non-GAAP adjusted results presented below exclude the impact of the following, where applicable: certain discrete tax items; restructuring charges and any associated adjustments; certain acquisition-related costs; impairments of assets, goodwill, or investments; and/or gain or loss on sale of facilities. These non-GAAP adjusted measures are not in accordance with GAAP and may differ from non-GAAP methods of accounting and reporting used by other companies. The presentation of this additional information should not be considered a substitute for results prepared in accordance with GAAP.

The following tables present a reconciliation of the GAAP and non-GAAP adjusted consolidated results for the three months ended January 27, 2013, October 28, 2012 and January 29, 2012:

APPLIED MATERIALS, INC.

UNAUDITED RECONCILIATION OF GAAP TO NON-GAAP ADJUSTED RESULTS

(In millions, except percentages)	Three Months Ended		
	January 27, 2013	October 28, 2012	January 29, 2012

Non-GAAP adjusted operating margin percent (% of net sales)	(95.7)%	(74.2)%	(8.2)%

¹ These items are incremental charges attributable to acquisitions, consisting of inventory fair value adjustments on products sold, and amortization of purchased intangible assets.

² Results for the three months ended January 27, 2013 included asset impairment charges of \$3 million related to the restructuring program announced on May 10, 2012 and severance charges of \$2 million related to the integration of Varian.

³ Results for the three months ended October 28, 2012 included restructuring and asset impairment charges of \$7 million related to the restructuring program announced on May 10, 2012, and severance charges of \$6 million related to the integration of Varian.

Note: The reconciliation of GAAP and non-GAAP adjusted segment results above does not include certain operating expenses that are managed separately at the corporate level and certain expenses that are not absorbed by the segments, which are reported within corporate and unallocated costs and included in consolidated operating income.

Item 3: Quantitative and Qualitative Disclosures About Market Risk

Applied is exposed to interest rate risk related to its investment portfolio and debt issuances. Applied's investment portfolio includes fixed-income securities with a fair value of approximately \$1.2 billion at January 27, 2013. These securities are subject to interest rate risk and will decline in value if interest rates increase. Based on Applied's investment portfolio at January 27, 2013, an immediate 100 basis point increase in interest rates would result in a decrease in the fair value of the portfolio of approximately \$23 million. While an increase in interest rates reduces the fair value of the investment portfolio, Applied will not realize the losses in the consolidated statement of operations unless the individual fixed-income securities are sold prior to recovery or the loss is determined to be other-than-temporary. At January 27, 2013, the carrying amount of debt issued by Applied was \$1.9 billion with an estimated fair value of \$2.2 billion. A hypothetical decrease in interest rates of 100 basis points would result in an increase in the fair value of Applied's debt issuances of approximately \$208 million at January 27, 2013.

Certain operations of Applied are conducted in foreign currencies, such as Japanese yen, euro, Israeli shekel, Taiwanese dollar and Swiss franc. Applied enters into currency forward exchange and option contracts to hedge a portion of, but not all, existing and anticipated foreign currency denominated transactions expected to occur within 24 months. Gains and losses on these contracts are generally recognized in income at the time that the related transactions being hedged are recognized. Because the effect of movements in currency exchange rates on currency forward exchange and option contracts generally offsets the related effect on the underlying items being hedged, these financial instruments are not expected to subject Applied to risks that would otherwise result from changes in currency exchange rates. Applied does not use derivative financial instruments for trading or speculative purposes.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

As of the end of the period covered by this report, management of Applied conducted an evaluation, under the supervision and with the participation of Applied's Chief Executive Officer and Chief Financial Officer, of the effectiveness of Applied's disclosure controls and procedures, as such term is defined in Rule 13a-15(e) of the Securities Exchange Act of 1934 (the Exchange Act). Based upon that evaluation, Applied's Chief Executive Officer and Chief Financial Officer concluded that Applied's disclosure controls and procedures were effective as of the end of the period covered by this report in ensuring that information required to be disclosed was recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and to provide reasonable assurance that information required to be disclosed by Applied in such reports is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

During the first quarter of fiscal 2013, there were no changes in the internal control over financial reporting, as such term is defined in Rule 13a-15(f) of the Exchange Act, that materially affected, or are reasonably likely to materially affect, Applied's internal control over financial reporting.

It should be noted that any system of controls, however well designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of the system will be met. In addition, the design of any control system is based in part upon certain assumptions about the likelihood of future events.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The information set forth above under the caption “Legal Matters” in Note 14 contained in Notes to Consolidated Condensed Financial Statements is incorporated herein by reference.

Item 1A: Risk Factors

The risk factors set forth below include any material changes to, and supersede the description of, the risk factors disclosed in Part I, Item 1A of Applied’s 2012 Form 10-K. These factors could materially and adversely affect Applied’s business, financial condition or results of operations and cause reputational harm, and they should be carefully considered in evaluating the Company and its business, in addition to other information presented elsewhere in this report.

The industries that Applied serves are volatile and difficult to predict.

As a supplier to the global semiconductor, flat panel display, and solar industries, Applied is subject to business cycles, the timing, length and volatility of which can be difficult to predict and which vary by reportable segment. These industries historically have been cyclical due to sudden changes in customers’ requirements for new manufacturing capacity and advanced technology, which depend in part on customers’ capacity utilization, production volumes, access to affordable capital, end-use demand, and inventory levels relative to demand, as well as the rate of technology transitions and general economic conditions. These changes have affected the timing and amounts of customers’ purchases and investments in technology, and continue to affect Applied’s orders, net sales, operating expenses and net income. More recently, consumer buying patterns for electronic products, combined with growing customer concentration, have led to a seasonality effect in demand for semiconductor equipment, particularly from foundry customers.

To meet rapidly changing demand in the industries it serves, Applied must accurately forecast demand and effectively manage its resources and production capacity for each of its segments as well as across multiple segments, and may incur unexpected or additional costs to align its business operations. During periods of increasing demand for its products, Applied must have sufficient manufacturing capacity and inventory to meet customer demand; effectively manage its supply chain; attract, retain and motivate a sufficient number of qualified employees; and continue to control costs. During periods of decreasing demand, Applied must reduce costs and align its cost structure with prevailing market conditions; effectively manage its supply chain; and motivate and retain key employees.

Applied is exposed to risks associated with the uncertain global economy.

Uncertain global economic conditions and low or negative growth in China, Europe, and the United States, along with difficulties in the financial markets, national debt and fiscal concerns in various regions, and government austerity measures, are posing challenges to the industries in which Applied operates. The markets for semiconductors and flat panel displays in particular depend largely on consumer spending, while the solar market depends in part on government incentives and the availability of financing for PV installations. Economic uncertainty and related factors exacerbate negative trends in business and consumer spending and may cause certain Applied customers to push out, cancel, or refrain from placing orders for equipment or services, which may in turn reduce Applied’s net sales, reduce backlog, and affect Applied’s ability to convert backlog to sales. Uncertain market conditions, difficulties in obtaining capital, or reduced profitability may also cause some customers to scale back operations, exit businesses, merge with other manufacturers, or file for bankruptcy protection and potentially cease operations, which can also result in lower sales and/or additional inventory or bad debt expense for Applied. These conditions may similarly affect key suppliers, which could impair their ability to deliver parts and result in delays for Applied’s products or added costs. In addition, these conditions may lead to strategic alliances by, or consolidation of, other equipment manufacturers, which could adversely affect Applied’s ability to compete effectively.

Uncertainty about future economic and industry conditions also makes it more challenging for Applied to forecast its operating results, make business decisions, and identify and prioritize the risks that may affect its businesses, sources and uses of cash, financial condition and results of operations. Applied may be required to implement additional cost reduction efforts, including restructuring activities, which may adversely affect Applied’s ability to capitalize on opportunities in a market recovery. In addition, Applied maintains an investment portfolio that is subject to general credit, liquidity, foreign exchange, market and interest rate risks. The risks to Applied’s investment portfolio may be exacerbated if financial market conditions deteriorate and, as a result, the value and liquidity of the investment portfolio, as well as returns on pension assets, could be negatively impacted and lead to impairment charges. Applied also maintains cash balances in various bank accounts globally in order to fund normal operations. If any of these financial institutions becomes insolvent, it could limit Applied’s ability to access cash in the affected accounts.

Applied is exposed to risks as a result of ongoing changes in the various industries in which it operates.

The global semiconductor, flat panel display, solar and related industries in which Applied operates are characterized by ongoing changes affecting some or all of these industries, including:

- the nature, timing and degree of visibility of changes in end demand for electronic products, including those related to fluctuations in consumer buying patterns tied to seasonality or the introduction of new products, and the effects of these changes on customers' businesses and, in turn, on demand for Applied's products;
- increasing capital requirements for building and operating new fabrication plants and customers' ability to raise the necessary capital, particularly when financial market conditions are difficult;
- differences in growth rates among the semiconductor, display and solar industries;
- the increasing importance of establishing, improving and maintaining strong relationships with customers;
- the increasing cost and complexity for customers to move from product design to volume manufacturing, which may slow the adoption rate of new manufacturing technology;
- the need to continually reduce the total cost of manufacturing system ownership, due in part to greater demand for lower-cost consumer electronics compared to business information technology spending;
- the heightened importance to customers of system reliability and productivity and the effect on demand for fabrication systems as a result of their increasing productivity, device yield and reliability;
- the increasing importance of, and difficulties in, developing products with sufficient differentiation to influence customers' purchasing decisions;
- requirements for shorter cycle times for the development, manufacture and installation of manufacturing equipment;
- price and performance trends for semiconductor devices, LCDs and solar PVs, and the corresponding effect on demand for such products;
- the increasing importance of the availability of spare parts to maximize the time that customers' systems are available for production;
- the increasing role for and complexity of software in Applied products; and
- the increasing focus on reducing energy usage and improving the environmental impact and sustainability associated with manufacturing operations.

Applied is exposed to risks as a result of ongoing changes specific to the semiconductor industry.

The largest proportion of Applied's consolidated net sales and profitability has been and continues to be derived from sales of manufacturing equipment by the Silicon Systems Group to the global semiconductor industry. In addition, a majority of the revenues of Applied Global Services is from sales of service products to semiconductor manufacturers. The semiconductor industry is characterized by ongoing changes particular to this industry, including:

- the increasing cost of research and development due to many factors, including: decreasing linewidths on a chip, the use of new materials such as cobalt and yttrium, new and more complex device structures, more applications and process steps, increasing chip design costs, and the increasing cost and complexity of integrated manufacturing processes;
- the need to reduce product development time, despite the increasing difficulty of technical challenges;
- the growing number of types and varieties of semiconductors and number of applications across multiple substrate sizes;
- the increasing cost and complexity for semiconductor manufacturers to move more technically advanced capability and smaller linewidths to volume manufacturing, and the resulting impact on the rates of technology transition and investment in capital equipment;
- challenges in generating organic growth given semiconductor manufacturers' levels of capital expenditures and the allocation of capital investment to market segments that Applied does not serve, such as lithography, or segments where Applied's products have lower relative market share;
- the importance of increasing market positions in under-penetrated segments, such as etch and inspection;
- the growing demand for mobility products, such as tablets and smartphones, and corresponding industry investment in devices that require fewer Applied products to manufacture, such as NAND flash memory, than are needed to make devices used in other applications, such as DRAM for personal computers;

- the adoption of cloud-based memory storage particularly for mobility products, and the associated inhibiting effect on NAND bit growth rates;
- the increasing frequency and complexity of technology transitions and inflections, such as 3-D transistors and advanced interconnects;
- shorter cycle times between order placements by customers (particularly foundries) and product shipment, which may lead to inventory write-offs and manufacturing inefficiencies that decrease gross margin;
- competitive factors that make it difficult to enhance market share, including challenges in securing development-tool-of-record (DTOR) and production-tool-of-record (PTOR) positions with customers;
- shifts in sourcing strategies by computer and electronics companies that impact the equipment requirements of Applied's foundry customers;
- the concentration of new wafer starts in Korea, where Applied's service penetration and service-revenue-per-wafer-start have been lower than in other regions; and
- the increasing fragmentation of semiconductor markets, leading certain markets to become too small to support the cost of a new fabrication plant, while others require less technologically advanced products.

Applied must accurately forecast, and allocate appropriate resources and investment towards addressing, key technology changes and inflections, such as the transition to 20nm devices, in order to enable opportunities for market share gains. In addition, the industry transition from 300mm to 450mm wafers presents opportunities as well as risks and uncertainties, including those related to cost, technical complexity, timing, and the resulting effect on demand for manufacturing equipment and services. Recently, several semiconductor customers have invested in another wafer fabrication equipment supplier to help fund development of 450mm and other new technologies, which may influence the timing of technology transitions, funding allocations or other matters.

Applied is exposed to risks as a result of ongoing changes specific to the solar industry.

Investment levels in capital equipment for the global solar industry have experienced considerable volatility. Current global solar PV production capacity exceeds anticipated near-term end-use demand, causing customers to significantly reduce or delay investments in manufacturing capacity and new technology, or to cease operations. The global solar market is characterized by ongoing changes specific to this industry that impact demand for and/or the profitability of Applied's solar products, including:

- the need to continually decrease the cost-per-watt of electricity produced by solar PV products to at or below grid parity in more global regions by, among other things, reducing operating costs and increasing throughputs for solar PV manufacturing, and improving the conversion efficiency of solar PVs;
- the variability and uncertainty of government energy policies and their effect in influencing the rate of growth of the solar PV market, including the availability and amount of incentives for solar power such as tax credits, feed-in tariffs, rebates, renewable portfolio standards that require electricity providers to sell a targeted amount of energy from renewable sources, and goals for solar installations on government facilities;
- the number of solar PV manufacturers and amount of global production capacity for solar PVs, primarily in China;
- the filing of regulatory unfair trade proceedings against solar PVs from China, where most of Applied's solar equipment sales are concentrated, which has resulted in the assessment of duties on solar cells and modules imported from China and led to other trade-related conflicts and outcomes;
- the varying levels of operating and industry experience among solar PV manufacturers and the resulting differences in the nature and extent of customer support services requested from Applied;
- challenges associated with marketing and selling manufacturing equipment and services to a diverse and diffuse customer base;
- the growth of market segments in which Applied does not participate, such as passivation and furnaces;
- complexities associated with government-affiliated entities as customers, for example in China;
- the financial condition of solar PV customers and their access to affordable financing and capital; and
- solar panel manufacturing overcapacity, which has led to weak industry operating performance and outlooks, deterioration of the solar equipment market, and a worsening of the financial condition of certain customers.

Applied is exposed to risks as a result of ongoing changes specific to the flat panel display industry.

The global flat panel display industry historically has experienced considerable volatility in capital equipment investment levels, due in part to the limited number of LCD manufacturers, the concentrated nature of LCD end-use applications, excess production capacity relative to end-use demand, and panel manufacturer profitability. Industry growth has depended primarily on consumer demand for increasingly larger and more advanced LCD TVs, which demand has slowed significantly, and more recently on demand for smartphones and other mobile devices, which demand is highly sensitive to cost and improvements in technologies and features. The display industry is characterized by ongoing changes particular to this industry, including:

- the timing and extent of a planned expansion of manufacturing facilities in China by Chinese display manufacturers and manufacturers from other countries, and the ability of non-Chinese manufacturers to obtain government approvals on a timely basis;
- the slowing rate of transition to larger substrate sizes for LCD TVs and the resulting effect on capital intensity in the industry and on Applied's product differentiation, gross margin and return on investment;
- the importance of new types of display technologies, such as low temperature polysilicon (LTPS), organic light-emitting diode (OLED) and metal oxide, and new touch panel films, such as anti-reflective and anti-fingerprint; and
- uncertainty with respect to future LCD technology end-use applications and growth drivers.

Applied must continually innovate, commercialize its products, and adapt its business and product offerings to respond to competition and rapid technological changes.

As Applied operates in a highly competitive environment in which innovation is critical, its future success depends on many factors, including the effective commercialization and customer acceptance of its equipment, services and related products. In addition, Applied must successfully execute its growth strategy, including enhancing market share in existing markets, expanding into related markets, cultivating new markets and exceeding industry growth rates, while constantly improving its operational performance. The development, introduction and support of a broadening set of products in more collaborative, geographically diverse, open and varied competitive environments have grown more complex and expensive over time. Furthermore, new or improved products may entail higher costs and reduced profits. Applied's performance may be adversely affected if it does not timely, cost-effectively and successfully:

- identify and address technology inflections, market changes, new applications, customer requirements and end-use demand;
- develop new products (including disruptive technologies), improve and/or develop new applications for existing products, and adapt similar products for use by customers in different applications and/or markets with varying technical requirements;
- differentiate its products from those of competitors and any disruptive technologies, meet customers' performance specifications, appropriately price products, and achieve market acceptance;
- maintain operating flexibility to enable different responses to different markets, customers and applications;
- enhance its worldwide operations across all business segments to reduce cycle time, enable continuous quality improvement, reduce costs, and enhance design for manufacturability and serviceability;
- focus on product development and sales and marketing strategies that address customers' high value problems and foster strong customer relationships;
- allocate resources, including people and R&D funding, among Applied's products and between the development of new products and the enhancement of existing products, as most appropriate and effective for future growth;
- reduce the cost and improve the productivity of capital invested in R&D activities;
- accurately forecast demand, work with suppliers and meet production schedules for its products;
- improve its manufacturing processes and achieve cost efficiencies across product offerings;
- adapt to changes in value offered by companies in different parts of the supply chain;
- qualify products for evaluation and, in turn, volume manufacturing with its customers; and
- implement changes in its design engineering methodology, including those that enable reduction of material costs and cycle time, greater commonality of platforms and types of parts used in different systems, greater effectiveness of product life cycle management, and reduced energy usage and environmental impact.

Applied is exposed to risks associated with a highly concentrated customer base.

Applied's semiconductor customer base historically has been, and is becoming even more, highly concentrated as a result of economic and industry conditions. In the first quarter of fiscal 2013, three semiconductor manufacturers accounted for 75 percent of Silicon Systems Group net sales as well as 56 percent of Applied's consolidated net sales. Applied's display customer base is also highly concentrated, while concentration within Applied's solar customer base varies depending on the product line but is increasing due to challenging industry conditions. Applied's customer base is also geographically concentrated. In the first quarter of fiscal 2013, customers in Taiwan accounted for 48 percent of net sales for the Silicon Systems Group segment; customers in Korea and China accounted for essentially all of the net sales for the Display segment; and customers in China accounted for 33 percent of net sales for the Energy and Environmental Solutions segment.

In addition, certain customers have experienced significant ownership or management changes, consolidated with other manufacturers, outsourced manufacturing activities, or engaged in collaboration or cooperation arrangements with other manufacturers. Customers have entered into strategic alliances or industry consortia that have increased the influence of key industry participants in technology decisions made by their partners. Also, certain customers are making an increasingly greater percentage of their respective industry's capital equipment investments. Further, claims or litigation involving key industry participants may result in changes in sourcing strategies and other outcomes. In this environment, contracts or orders from a relatively limited number of manufacturers have accounted for, and are expected to continue to account for, a substantial portion of Applied's business. The mix and type of customers, and sales to any single customer, may vary significantly from quarter to quarter and from year to year. If customers do not place orders, or they substantially reduce, delay or cancel orders, Applied may not be able to replace the business. As Applied's products are configured to customer specifications, changing, rescheduling or canceling orders may result in significant, non-recoverable costs. Major customers may also seek, and on occasion receive, pricing, payment, intellectual property-related, or other commercial terms that are less favorable to Applied.

Applied is exposed to the risks of operating a global business.

In the first quarter of fiscal 2013, approximately 75 percent of Applied's net sales were to customers in regions outside the United States. Moreover, China now represents the largest market for various electronic products, such as TVs, PCs, and smartphones. Certain of Applied's R&D and manufacturing facilities, as well as suppliers to Applied, are also located outside the United States, including in Singapore, Taiwan, China, Korea, Israel, Germany, Italy and Switzerland. Applied is also expanding its business and operations in new countries. The global nature of Applied's business and operations, combined with the need to continually improve the Company's operating cost structure, presents challenges, including but not limited to those arising from:

- varying regional and geopolitical business conditions and demands;
- political and social attitudes, laws, rules, regulations and policies within countries that favor domestic companies over non-domestic companies, including customer- or government-supported efforts to promote the development and growth of local competitors;
- customer- or government-supported efforts to influence Applied to conduct more of its operations in a particular country, such as Korea and China;
- variations among, and changes in, local, regional, national or international laws and regulations (including intellectual property, labor, tax, and import/export laws), as well as the interpretation and application of such laws and regulations;
- global trade issues, including those related to the interpretation and application of import and export licenses, as well as international trade disputes;
- positions taken by governmental agencies regarding possible national commercial and/or security issues posed by international business operations;
- fluctuating raw material, commodity, energy and shipping costs or shipping delays;
- challenges associated with managing more geographically diverse operations and projects, which require an effective organizational structure and appropriate business processes, procedures and controls;
- a more diverse workforce with different experience levels, cultures, customs, business practices and worker expectations;
- variations in the ability to develop relationships with local customers, suppliers and governments;
- fluctuations in interest rates and currency exchange rates, including the relative strength or weakness of the U.S. dollar against the Japanese yen, euro, Taiwanese dollar, Israeli shekel or Chinese yuan;
- the need to provide sufficient levels of technical support in different locations around the world;

- political instability, natural disasters (such as earthquakes, floods or storms), pandemics, social unrest, terrorism or acts of war in locations where Applied has operations, suppliers or sales, or that may influence the value chain of the industries that Applied serves;
- the need for an effective business continuity plan if a disaster or other event occurs that could disrupt business operations;
- the need to regularly reassess the size, capability and location of global infrastructure and make appropriate changes;
- cultural and language differences;
- difficulties and uncertainties associated with the entry into new countries;
- hiring and integration of an increasing number of new workers, including in countries such as India and China;
- the increasing need for the workforce to be more mobile and work in or travel to different regions;
- uncertainties with respect to economic growth rates in various countries; and
- uncertainties with respect to growth rates for the manufacture and sale of semiconductors, LCDs and solar PVs in the developing economies of certain countries.

Many of these challenges are present in China and Korea, which are experiencing significant growth of customers, suppliers and competitors to Applied. Applied further believes that China and Korea present large potential markets for its products and opportunity for growth over the long term, although at lower projected levels of profitability and margins for certain products than historically have been achieved in other regions.

Operating in multiple industries, and the entry into new markets and industries, entail additional challenges and obligations.

As part of its growth strategy, Applied must successfully expand into related or new markets and industries, either with its existing products or with new products developed internally or obtained through acquisitions. The entry into different markets involves additional challenges, including those arising from:

- the need to devote additional resources to develop new products for, and operate in, new markets;
- the need to develop new sales and technical marketing strategies, cultivate relationships with new customers and meet different customer service requirements;
- differing rates of profitability and growth among multiple businesses;
- Applied's ability to anticipate demand, capitalize on opportunities, and avoid or minimize risks;
- the complexity of managing multiple businesses with variations in production planning, execution, supply chain management and logistics;
- the adoption of new business models, business processes and systems;
- Applied's ability to rapidly expand or reduce its operations to meet increased or decreased demand, respectively, and the associated effect on working capital;
- new materials, processes and technologies;
- the need to attract, motivate and retain employees with skills and expertise in these new areas;
- new and more diverse customers and suppliers, including some with limited operating histories, uncertain and/or limited funding, evolving business models and/or locations in regions where Applied does not have, or has limited, operations;
- new or different competitors with potentially more financial or other resources, industry experience and/or established customer relationships;
- entry into new industries and countries, with differing levels of government involvement, laws and regulations, and business, employment and safety practices;
- third parties' intellectual property rights; and
- the need to comply with, or work to establish, industry standards and practices.

In addition, Applied from time to time receives funding from United States and other government agencies for certain strategic development programs to increase its research and development resources and address new market opportunities. As a condition to this government funding, Applied may be subject to certain record-keeping, audit, intellectual property rights-sharing and/or other obligations.

Manufacturing interruptions or delays could affect Applied's ability to meet customer demand and lead to higher costs, while the failure to estimate customer demand accurately could result in excess or obsolete inventory.

Applied's business depends on its timely supply of equipment, services and related products that meet the rapidly changing technical and volume requirements of its customers, which depends in part on the timely delivery of parts, components and subassemblies (collectively, parts) from suppliers, including contract manufacturers. Some key parts are subject to long lead-times and/or obtainable only from a single supplier or limited group of suppliers, and some sourcing or subassembly is provided by suppliers located in countries other than the countries where Applied conducts its manufacturing, including China and Korea. Cyclical industry conditions and the volatility of demand for manufacturing equipment increase capital, technical, operational and other risks for Applied and for companies throughout its supply chain. Further, the adverse conditions in the credit and financial markets and industry slowdowns have caused, and may continue to cause, some suppliers to scale back operations, exit businesses, merge with other companies, or file for bankruptcy protection and possibly cease operations. Applied may also experience significant interruptions of its manufacturing operations, delays in its ability to deliver products or services, increased costs or customer order cancellations as a result of:

- the failure or inability of suppliers to timely deliver sufficient quantities of quality parts on a cost-effective basis;
- volatility in the availability and cost of materials, including rare earth elements;
- difficulties or delays in obtaining required import or export approvals;
- information technology or infrastructure failures; and
- natural disasters or other events beyond Applied's control (such as earthquakes, floods or storms, regional economic downturns, pandemics, social unrest, political instability, terrorism, or acts of war), particularly where it conducts manufacturing.

If a supplier fails to meet Applied's requirements concerning quality, cost, socially-responsible business practices, or other performance factors, Applied may transfer its business to alternative sources, which could entail manufacturing delays, additional costs, or other difficulties. In addition, if Applied needs to rapidly increase its business and manufacturing capacity to meet increases in demand or expedited shipment schedules, this may exacerbate any interruptions in Applied's manufacturing operations and supply chain and the associated effect on Applied's working capital. Moreover, if actual demand for Applied's products is different than expected, Applied may purchase more/fewer parts than necessary or incur costs for canceling, postponing or expediting delivery of parts. If Applied purchases inventory in anticipation of customer demand that does not materialize, or if customers reduce or delay orders, Applied may incur excess inventory charges.

The ability to attract, retain and motivate key employees is vital to Applied's success.

Applied's success, competitiveness and ability to execute on its global strategies and maintain a culture of innovation depend in large part on its ability to attract, retain and motivate key employees, especially in critical positions. Achieving this objective may be difficult due to many factors, including fluctuations in global economic and industry conditions, management changes, Applied's organizational structure, hiring practices of competitors and other companies, cost reduction activities (including workforce reductions and unpaid shutdowns), availability of career development opportunities, the ability to obtain necessary authorizations for workers to provide services outside their home countries, and the effectiveness of Applied's compensation and benefit programs, including its share-based programs. Restructuring programs present particular challenges to the extent they involve the departure of knowledgeable and experienced employees and the resulting need to identify and train existing or new workers to perform necessary functions, which may result in unexpected costs, reduced productivity, and/or difficulties with respect to internal processes and controls.

Applied is exposed to risks associated with acquisitions and strategic investments.

Applied has made, and in the future intends to make, acquisitions of or investments in companies, technologies or products in existing, related or new markets for Applied. In November 2011, Applied completed its acquisition of Varian Semiconductor Equipment Associates, Inc. (Varian), which was the Company's largest acquisition to date. Acquisitions involve numerous risks that vary depending on the scale and nature of the acquisition, including but not limited to:

- diversion of management's attention from other operational matters;
- inability to complete acquisitions as anticipated or at all;
- the failure of acquired businesses to meet or exceed expected returns;
- requirements imposed by government regulators in connection with their review of a transaction, which may include, among other things, divestitures and/or restrictions on the conduct of Applied's existing business or the acquired business;
- ineffective integration of operations, systems, technologies, products or employees of an acquired business, which can impact the ability to realize anticipated synergies or other benefits;
- failure to commercialize purchased technologies;
- initial dependence on unfamiliar supply chains or relatively small supply partners;
- inability to capitalize on characteristics of new markets that may be significantly different from Applied's existing markets and where competitors may have stronger market positions and customer relationships;
- failure to attract, retain and motivate key employees from the acquired business;
- reductions in cash balances and/or increases in debt obligations to finance the acquisition, which reduce the availability of cash flow for general corporate or other purposes;
- exposure to new operational risks, rules, regulations, worker expectations, customs and practices to the extent acquired businesses are located in regions where Applied has not historically conducted business;
- challenges associated with managing new, more diverse and more widespread operations, projects and people;
- inability to obtain and protect intellectual property rights in key technologies;
- inadequacy or ineffectiveness of an acquired company's internal financial controls, disclosure controls and procedures, and/or environmental, health and safety, anti-corruption, human resource, or other policies or practices;
- impairment of acquired intangible assets and goodwill as a result of changing business conditions, technological advancements or worse-than-expected performance of the segment;
- the risk of litigation or claims associated with a proposed or completed transaction;
- unknown, underestimated and/or undisclosed commitments or liabilities; and
- the inappropriate scale of acquired entities' critical resources or facilities for business needs.

Applied also makes strategic investments in other companies, including companies formed as joint ventures, which may decline in value and/or not meet desired objectives. The success of these investments depends on various factors over which Applied may have limited or no control and, particularly with respect to joint ventures, requires ongoing and effective cooperation with strategic partners. The risks to Applied's strategic investment portfolio may be exacerbated by unfavorable financial market and macroeconomic conditions and, as a result, the value of the investment portfolio could be negatively impacted and lead to impairment charges.

Applied is exposed to various risks related to protection and enforcement of intellectual property rights and cybersecurity threats.

Applied's success depends in significant part on the protection of its intellectual property and other rights. Infringement of Applied's rights by a third party, such as the unauthorized manufacture or sale of equipment or spare parts, could result in uncompensated lost market and revenue opportunities for Applied. Policing any unauthorized use of intellectual property is difficult and costly and Applied cannot be certain that the measures the Company has implemented will prevent misuse. Applied's intellectual property rights may not provide significant competitive advantages if they are circumvented, invalidated, rendered obsolete by the rapid pace of technological change, or if Applied does not adequately protect or assert these rights or obtain necessary licenses on commercially reasonable terms. Furthermore, the laws and practices of other countries, including China, India, Taiwan and Korea, permit the protection and enforcement of Applied's rights to varying extents, which may not be sufficient to adequately protect Applied's rights. In addition, changes in intellectual property laws or their interpretation, such as recent changes in U.S. patent laws, may impact Applied's ability to protect and assert its intellectual property rights, increase costs and uncertainties in the prosecution of patent applications and enforcement or defense of issued patents, and diminish the value of Applied's intellectual property.

Applied has experienced and expects to continue to be subject to global cybersecurity threats and incidents, ranging from employee error or misuse to individual attempts to gain unauthorized access to information systems to sophisticated and targeted measures known as advanced persistent threats. These could result in business disruption; misappropriation, corruption or loss of confidential information (Applied's and/or that of third parties) and critical data; reputational damage; litigation with third parties; diminution in the value of Applied's investment in research, development and engineering; data privacy issues; and increased cybersecurity protection and remediation costs.

Applied is exposed to various risks related to legal proceedings.

Applied from time to time is, and in the future may be, involved in legal proceedings or claims regarding patent infringement, intellectual property rights, antitrust, environmental regulations, securities, contracts, product performance, product liability, unfair competition, misappropriation of trade secrets, employment, workplace safety, and other matters. Applied also on occasion receives notification from customers who believe that Applied owes them indemnification or other obligations related to claims made against such customers by third parties.

Legal proceedings and claims, whether with or without merit, and associated internal investigations, may (1) be time-consuming and expensive to prosecute, defend or conduct; (2) divert management's attention and other Applied resources; (3) inhibit Applied's ability to sell its products; (4) result in adverse judgments for damages, injunctive relief, penalties and fines; and/or (5) negatively affect Applied's business. There can be no assurance regarding the outcome of current or future legal proceedings, claims or investigations.

The failure to successfully implement and conduct outsourcing activities and other operational initiatives could adversely affect results of operations.

To better align its costs with market conditions, locate closer to customers, enhance productivity, and improve efficiencies, Applied conducts certain engineering, software development, manufacturing, sourcing and other operations in regions outside the United States, including India, Taiwan, China, and Korea. Applied has implemented a distributed manufacturing model, under which certain manufacturing and supply chain activities are conducted in various countries, including the United States, Europe, Israel, Singapore, Taiwan and other countries in Asia, and assembly of some systems is completed at customer sites. In addition, Applied outsources certain functions to third parties, including companies in the United States, India, China, Korea, Malaysia and other countries. Outsourced functions include contract manufacturing, engineering, customer support, software development, information technology support, finance and administrative activities. The expanding role of third party providers has required changes to Applied's existing operations and the adoption of new procedures and processes for retaining and managing these providers, as well as redistributing responsibilities as warranted, in order to realize the potential productivity and operational efficiencies, assure quality and continuity of supply, and protect the intellectual property of Applied and its customers, suppliers and other partners. If Applied does not accurately forecast the amount, timing and mix of demand for products, or if contract manufacturers or other outsource providers fail to perform in a timely manner or at satisfactory quality levels, Applied's ability to meet customer requirements could suffer, particularly during a market upturn.

In addition, Applied must regularly implement or update comprehensive programs and processes to better align its global organizations, including initiatives to enhance the Asia supply chain and improve back office and information technology infrastructure for more efficient transaction processing. Applied also is implementing a multi-year, company-wide program to transform certain business processes or extend established processes, including the transition to a single enterprise resource planning (ERP) software system to perform various functions. The implementation of additional functionality to the ERP system entails certain risks, including difficulties with changes in business processes that could disrupt Applied's operations, such as its ability to track orders and timely ship products, project inventory requirements, manage its supply chain and aggregate financial and operational data. During transitions Applied must continue to rely on legacy information systems, which may be costly or inefficient, while the implementation of new initiatives may not achieve the anticipated benefits and may divert management's attention from other operational activities, negatively affect employee morale, or have other unintended consequences.

If Applied does not effectively develop and implement its outsourcing and relocation strategies, if required export and other governmental approvals are not timely obtained, if Applied's third party providers do not perform as anticipated, or if there are delays or difficulties in enhancing business processes, Applied may not realize anticipated productivity improvements or cost efficiencies, and may experience operational difficulties, increased costs (including energy and transportation), manufacturing interruptions or delays, inefficiencies in the structure and/or operation of its supply chain, loss of its intellectual property rights, quality issues, reputational harm, increased product time-to-market, and/or inefficient allocation of human resources.

Applied may incur impairment charges to goodwill or long-lived assets.

Applied has a significant amount of goodwill and other acquired intangible assets related to acquisitions. Goodwill and purchased intangible assets with indefinite useful lives are not amortized, but are reviewed for impairment annually during the fourth quarter of each fiscal year, and more frequently when events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. The review compares the fair value for each of Applied's reporting units to its associated carrying value, including goodwill. Factors that could lead to impairment of goodwill and intangible assets include adverse industry or economic trends, reduced estimates of future cash flows, declines in the market price of Applied common stock, changes in Applied's strategies or product portfolio, and restructuring activities. Applied's valuation methodology for assessing impairment requires management to make judgments and assumptions based on historical experience and projections of future operating performance. Applied may be required to record future charges to earnings during the period in which an impairment of goodwill or amortizable intangible assets is determined to exist.

Changes in tax rates or tax assets and liabilities could affect results of operations.

As a global company, Applied is subject to taxation in the United States and various other countries. Significant judgment is required to determine and estimate worldwide tax liabilities. Applied's future annual and quarterly tax rates could be affected by numerous factors, including changes in the: (1) applicable tax laws; (2) amount and composition of pre-tax income in countries with differing tax rates; (3) plans of the Company to permanently reinvest certain funds held outside of the U.S.; or (4) valuation of Applied's deferred tax assets and liabilities.

To better align with the international nature of its business, Applied conducts certain manufacturing, supply chain, and other operations in Asia, bringing these activities closer to customers and reducing operating costs. Applied has received authorization to use tax incentives that provide that income earned in certain countries outside the U.S. will be subject to tax holidays or reduced income tax rates. To obtain the benefit of these tax provisions, Applied must meet requirements relating to various activities. Applied's ability to realize benefits from these provisions could be materially affected if, among other things, applicable requirements are not met, or if Applied incurs net losses for which it cannot claim a deduction.

In addition, Applied is subject to regular examination by the Internal Revenue Service and other tax authorities, and from time to time initiates amendments to previously filed tax returns. Applied regularly assesses the likelihood of favorable or unfavorable outcomes resulting from these examinations and amendments to determine the adequacy of its provision for income taxes, which requires estimates and judgments. Although Applied believes its tax estimates are reasonable, there can be no assurance that the tax authorities will agree with such estimates. Applied may have to engage in litigation to achieve the results reflected in the estimates, which may be time-consuming and expensive. There can be no assurance that Applied will be successful or that any final determination will not be materially different from the treatment reflected in Applied's historical income tax provisions and accruals.

Applied is subject to risks of non-compliance with environmental and safety regulations.

Applied is subject to environmental and safety regulations in connection with its global business operations, including but not limited to: regulations related to the development, manufacture and use of its products; recycling and disposal of materials used in its products or in producing its products; the operation of its facilities; and the use of its real property. The failure or inability to comply with existing or future environmental and safety regulations, such as those related to climate change, could result in: (1) significant remediation liabilities; (2) the imposition of fines; (3) the suspension or termination of the development, manufacture, sale or use of certain of its products; (4) limitations on the operation of its facilities or ability to use its real property; and/or (5) a decrease in the value of its real property.

Applied is exposed to various risks related to the regulatory environment.

Applied is subject to various risks related to: (1) new, different, inconsistent or even conflicting laws, rules and regulations that may be enacted by executive order, legislative bodies and/or regulatory agencies in the countries in which Applied operates; (2) disagreements or disputes between national or regional regulatory agencies related to international trade; and (3) the interpretation and application of laws, rules and regulations. For example, as a public company with global operations, Applied is subject to the laws of multiple jurisdictions and the rules and regulations of various governing bodies, including those related to financial and other disclosures, corporate governance, privacy, and anti-corruption. Changes in laws, regulations and standards may create uncertainty regarding compliance matters. Efforts to comply with new and changing regulations have resulted in, and are likely to continue to result in, increased general and administrative expenses and a diversion of management time and attention from revenue-generating activities to compliance activities.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table provides information as of January 27, 2013 with respect to the shares of common stock repurchased by Applied during the first quarter of fiscal 2013.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Aggregate Price Paid	Total Number of Shares Purchased as Part of Publicly Announced Program*	Maximum Dollar Value of Shares That May Yet be Purchased Under the Program*
(In millions, except per share amounts)

CERTIFICATION

I, Michael R. Splinter, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Applied Materials, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
